## Investment Policy

The primary investment objective of the fund is real-term capital preservation and long-term capital enhancement through regular income, as well as capital and currency gains. The investment decisions are rule-based by using a momentum- / mean-reverting approach. The fund invests in a broadly diversified portfolio of passive index instruments such as exchange traded funds (ETFs), index-oriented investment funds, structured products, and derivatives. The fund is invested worldwide in equities, bonds, currencies and alternative investments. The overall foreign currency exposure is predominantly hedged back in Swiss francs.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

## Performance overview - monthly & cumulative

since 01.01.2024

## Performance overview - cumulative

since 01.11.2014

Until **20.07.2018**, the Fund had different characteristics and performance was achieved under circumstances that no longer apply. Repositioning as per 20.07.2018 (Old Fund name: Credit Suisse (Lux) IndexSelection Fund Balanced CHF).

### Asset breakdown

By asset class in % of total economic exposure

|                                 |
|---------------------------------|
| Cash and Cash Equivalents: 1.22 |
| Fixed Income: 37.37             |
| Equities: 53.33                 |
| Commodities: 5.38               |
| Real Estate: 2.70               |

### Asset breakdown

By instrument currency in % of total economic exposure (after currency hedging)

|            |              |
|------------|--------------|
| CHF: 80.58 | AUD: 0.15    |
| USD: 5.52  | CAD: 0.06    |
| JPY: 2.56  | EUR: 0.01    |
| GBP: 2.50  | Others: 8.61 |

### Asset breakdown

By type in % of bond economic exposure

|                              |
|------------------------------|
| Straight bonds: 75.47        |
| Emerging Market bonds: 15.02 |
| High Yield bonds: 9.52       |

### Asset breakdown

By duration in % of bond economic exposure

|                  |
|------------------|
| <1 year: 20.09   |
| 1-3 years: 29.48 |
| 3-5 years: 33.18 |
| 5-7 years: 15.66 |
| 7-10 years: 1.59 |

## Asset breakdown by asset class & country

In % of total economic exposure

|                  | Cash and Cash Equivalents | Fixed Income | Equities     | Alternatives | Total         |
|------------------|---------------------------|--------------|--------------|--------------|---------------|
| USA              | -                         | 10.64        | 14.44        | -            | 25.08         |
| Euroland         | -                         | 7.51         | 12.86        | -            | 20.37         |
| Switzerland      | -                         | 7.55         | 12.71        | -            | 20.27         |
| Emerging Markets | -                         | 5.61         | 8.51         | -            | 14.12         |
| Global           | -                         | 3.56         | -            | 8.08         | 11.64         |
| United Kingdom   | -                         | 2.50         | 2.46         | -            | 4.96          |
| Japan            | -                         | -            | 2.34         | -            | 2.34          |
| Others           | 1.22                      | -            | -            | -            | 1.22          |
| <b>Total</b>     | <b>1.22</b>               | <b>37.37</b> | <b>53.33</b> | <b>8.08</b>  | <b>100.00</b> |

Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

## Performance commentary

Equities largely moved sideways with notable weakness showing in China as well as in Europe. The NASDAQ outperformed and reached a new all-time high last Wednesday but has corrected since. Yields generally trended upwards with the 10-year Treasury now well over the 4% mark. The volatility of bonds in general picked up sharply over the month, and we see markets pricing a relatively frontloaded rate-cutting cycle. Reflecting a more benign economic environment, the USD has gained some strength from its September low.

## Market comments

This year's deliberations whether the US economy is headed for a hard or a soft landing while unwinding a historic rate hike are gravitating towards a "no landing" scenario with data pointing to receding inflation but growth remaining slightly above trend. The Fed's monetary policy is still deemed restrictive, opening opportunities for further cuts, albeit at a slower pace than expected earlier this year. The imminent presidential election might introduce some volatility to markets due to controversies around the result, however, it will most likely be of short-term nature. Meanwhile, China is still confronted with structural economic challenges stemming from a combination of an ageing population, high debt and a high degree of reliance on investment to drive growth. It faces a severe risk of "japanification" with a lost decade of slow growth and deflation. The recent policy response, to induce a major stimulus, is aimed at countering exactly this scenario. If this is sufficient to effect a turnaround remains to be seen.

## Comments on positioning

The model is still in a risk-on mode, albeit less so than during the summer. Equities are overweight against investment grade bonds. High yield and emerging market bonds are at neutral levels as are REITS and commodities.

## Comments on transactions

No major transactions

<sup>2</sup> CS Product Sustainability Classifications and SFDR Article are valid at the time of publishing and may be subject to change.<sup>3</sup> If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.<sup>4</sup> This is an indicative allocation which may change over time. This product is not a direct investment the collaterals displayed above. As a result, it does not reflect the actual performance of the product either positively or negatively. The individual entities and/or instruments mentioned on this page are meant for illustration purposes only and are not intended as a solicitation or an offer to buy or sell any interest or any investment.

**Potential Risks**

The Fund’s risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund’s investments generally have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Fund’s investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Fund’s derivative counterparties may lead to payment or delivery default.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product’s investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

**The Fund’s use of leverage may lead to an amplified reaction to market movements, i.e. increase the volatility of the Fund and may amount to a more substantial loss than in unleveraged products. The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only. Any decision to invest should take into account all the characteristics or objectives of the promoted fund as described in its prospectus, or similar legal documentation.**

**Risk profile<sup>5</sup>**

PRIP, SRI

Larger values (up to 7) indicate higher risk while lower values (up to 1) indicate lower risk.

**ESG Approach**

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector). It applies the CSAM Sustainable Investing Policy ([www.credit-suisse.com/esg](http://www.credit-suisse.com/esg)), including norms-based, values-based and business conduct exclusions. Based on research on ESG factors and/or the classification of funds, ESG Factors are considered within the portfolio construction depending on the underlying asset class. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit [www.credit-suisse.com/esg](http://www.credit-suisse.com/esg). In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process. For details about the fund’s ESG decision-making process, please refer to the fund’s prospectus.

**ESG Overview**

According to MSCI methodology.

|  | Portfolio |
|--|-----------|
| ESG Rating   | AA        |
| ESG Quality score  | 7.25      |
| Environmental score  | 6.35      |
| Social score   | 5.84      |
| Governance score   | 6.41      |
| Coverage for Rating/Scoring                                | 92.30%    |
| Weighted Average Carbon Intensity (Tons of CO2e/\$M sales) | 84.99     |
| Coverage for Carbon Intensity                              | 74.08%    |

Note: The total carbon intensity figure shown in this section may be higher than the total in the breakdown graph. This is because the figure is normalized, and actual weights are inflated because of limited data coverage. For further information on the MSCI methodology for the above listed ESG data points, please refer to the glossary.

<sup>5</sup> The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

<sup>6</sup> Active Ownership is part of the fund’s strategy to act in the best interests of its investors and to preserve and optimize the long-term value of their investments. To promote best practices and to ensure that the investee companies are sustainable and successful in the long term, Active Ownership is designed to influence the investee companies on two levels: first, through proxy voting, and second, through engagement. In the case of investments in other funds (Target Funds), the fund has no or only limited ability to exercise Active Ownership on the Target Fund, resp. on the Target Funds’ investee companies.

## Top 10 positions - ESG Characteristics

As of 30.09.2024

In terms of the fund's total economic exposure. Certain data points disclosed in this table are provided for mere transparency purposes and are not linked to a specific ESG investment process. For details about the fund's ESG decision-making process, please refer to the fund's prospectus. Sources: MSCI, proprietary fixed income ESG Signal and proprietary ESG product classification

| Instrument Name <sup>7</sup>        | Weight in portfolio | GICS sector                          | Type of investment | ESG criteria                         | Result | Controversy flag | Carbon intensity (tCO <sub>2</sub> e / \$M sales) |
|-------------------------------------|---------------------|--------------------------------------|--------------------|--------------------------------------|--------|------------------|---|

Note: All ESG data points in the table refer to an underlying issuer as applicable (e.g., an equity issuer in case of a convertible bond). For further information on the methodology for the above listed ESG data points, please refer to the glossary.

## Asset breakdown by proprietary fixed income ESG Signal

According to proprietary methodology in % of fund total economic exposure from fixed income investments.

|           | in %  | Portfolio |
|-----------|-------|-----------|
| Positive  | 9.50  |           |
| Neutral   | 21.93 |           |
| Negative  | 3.20  |           |
| Not rated | 2.65  |           |

Note: Exposure to fixed income investments represents 37.29% of portfolio weight for this share class. According to the fund contract, the asset manager's ESG integration approach applies proprietary ESG signals. For further information on the fixed income ESG Signal, please refer to the glossary.

## Asset breakdown by ESG rating

In % of fund total economic exposure from equity investments. Source: MSCI ESG rating

|                  | in %  | Portfolio |
|------------------|-------|-----------|
| AAA              | 11.68 |           |
| AA               | 26.24 |           |
| A                | 11.50 |           |
| BBB              | 2.23  |           |
| BB               | 1.01  |           |
| B                | 0.00  |           |
| CCC              | -     |           |
| Not ratable      | -     |           |
| No data coverage | 0.00  |           |

Note: Exposure to equity investments represents 52.67% of portfolio weight for this share class. For further information on MSCI's ESG rating methodology and the difference between categories "not ratable" and "no data coverage", please refer to the glossary.

## Asset breakdown by ESG controversy flag

In % of fund total economic exposure to investee companies. Source: MSCI

|                  | in %  | Portfolio |
|------------------|-------|-----------|
| Green            | 25.57 |           |
| Yellow           | 17.84 |           |
| Orange           | 8.98  |           |
| Red              | 0.02  |           |
| No data coverage | 29.94 |           |

Note: Exposure to investee companies represents 82.35% of portfolio weight for this share class. MSCI only provides data on ESG controversies for corporate issuers. Any remaining instruments (e.g., government bonds) are excluded from this breakdown. For further information on MSCI's ESG controversy flag methodology, please refer to the glossary.

## Carbon emission intensity contribution by GICS sector

Tons of CO<sub>2</sub> equivalent emission intensity (GHG scopes 1 & 2) per \$m sales, by GICS sector split. Source: MSCI

|              | Portfolio    | Portfolio |
|--------------|--------------|-----------|
| Others       | 19.92        |           |
| Materials    | 15.98        |           |
| Utilities    | 14.59        |           |
| Equity       | 11.91        |           |
| Energy       | 5.76         |           |
| <b>Total</b> | <b>68.16</b> |           |

Note: Security weighted data coverage is 74.08% for the portfolio. The total shown in this section may be lower than the one in the 'ESG Overview' section. This is because the figures in this breakdown are not normalized and use the actual weights. For further information on the Carbon emission intensity, please refer to the glossary.

<sup>7</sup> This is an indicative allocation which may change over time. This product is not a direct investment the collaterals displayed above. As a result, it does not reflect the actual performance of the product either positively or negatively. The individual entities and/or instruments mentioned on this page are meant for illustration purposes only and are not intended as a solicitation or an offer to buy or sell any interest or any investment.

## Glossary

|  |   |
|--|---|
| Accumulating                                     | Indicates a regular reinvestment of the dividends received in the portfolio itself  |
| Annualized risk                                  | Annualized risk is a statistic, which is used to measure the risk of a fund by describing the range of returns, which were achieved in the observation period are most likely to be achieved. Greater volatility implies greater risk.  |
| Annualized return                                | A measure of how much an investment has increased on average each year during a specific period.  |
| Carbon emission intensity                        | The weighted average emissions intensity, which is provided by MSCI ESG, divides the Scopes 1 & 2 emissions in tons of CO <sub>2</sub> -equivalent by million \$ sales. Intensities are broken down by GICS sector and are security weighted.   |
| ESG aware  | This product undertakes investments that explicitly assess and integrate the sustainability characteristics of companies in the investment process.   |
| ESG benchmark                                    | A ticked 'ESG benchmark' box reflects that the ESG section in this document compares the ESG performance of the portfolio with an ESG index. In case the box is not ticked, this means that the ESG section in this document compares the ESG performance of the portfolio with a non-ESG index or that no comparison is performed due to a lack of a recognized benchmark. The investor shall read the legal documentation of the Fund to understand how the benchmark is used. In any case, a ticked 'ESG benchmark' box does not mean that the ESG benchmark is used to attain the ESG strategy of the fund.   |
| ESG Controversy Flag                             | ESG Controversy Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. Controversy flags can be red, orange, yellow or green. Red indicates that a company is involved in one or more very severe controversies. Orange indicates that a company has been involved in one or more recent severe structural controversies that are ongoing. Yellow indicates that the company is involved in severe-to-moderate level controversies. Green indicates that the company is not involved in any major controversies. For further information on the methodology, please refer to <a href="http://www.msci.com/esg-investing">www.msci.com/esg-investing</a> .                           |
| ESG Quality score                                | The ESG Quality score, based on MSCI ESG scores of underlyings, is measured on a scale from 0 (very poor) to 10 (very good). It does not correspond directly to the underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the portfolio ESG Quality score is adjusted by MSCI to reflect the industry-specific level of ESG risk exposure. As Pillar scores are absolute, and the portfolio ESG Quality score is relative, the first cannot be averaged to derive the latter. The coverage rate is security weighted.  |
| ESG product classification                       | Investments in funds are reviewed in a due diligence process and classified into the following groups: Traditional – no ESG coverage, ESG Exclusions, ESG Integrated, ESG Focus and ESG Active Impact. This product aims to have a significant portion of assets invested in target funds that comply with CSAM's sustainable investment framework.   |
| Issuer ESG Rating                                | Company and Government ESG Ratings, which are provided by MSCI ESG, are measured on a scale from AAA (highest rating) to CCC (lowest rating). Company ESG Ratings are based on the issuer's exposure to industry specific ESG risks and its ability to mitigate those risks relative to peers. Company ESG Ratings are calculated on an industry relative basis while the underlying individual E, S and G Ratings are absolute. Hence, the ESG Rating cannot be seen as an average of the individual E, S and G Ratings. Government ESG Ratings identify a country's exposure to and management of ESG risk factors and explain how these factors might impact the long-term sustainability of its economy. They are derived from 0-10 scores on underlying factors in the E, S and G pillars. For further information on the MSCI methodology, please refer to <a href="http://www.msci.com/esg-investing">www.msci.com/esg-investing</a> . |
| Ex post  | Refers to metrics based on historical data  |
| GICS   | Global Industry Classification Standard   |
| Greenhouse gas (GHG) emissions                   | Scope 1 emissions are generated by a company directly from owned or controlled sources such as the burning of fuels (stationary or mobile), industrial processes, etc. Scope 2 emissions are indirect emissions, primarily those associated with the electricity consumed by a company. Scope 3 emissions are all other indirect emissions associated with a company's operations, such as business travel, waste generated, and products both upstream (in the supply chain) and downstream (use of the products and end of life). Scope 3 emissions typically account for the largest proportion of a company's emissions.  |
| Maximum drawdown                                 | Represents the worst possible result (in percentage terms) that occurred during the period being analyzed.  |
| MTD  | Month-to-date   |
| MSCI   | MSCI refers to the external data provider MSCI ESG Research LLC and/or its affiliates.  |
| MSCI ESG Methodology                             | For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to <a href="http://www.msci.com/esg-investing">www.msci.com/esg-investing</a> .   |
| NAV  | Net Asset Value   |
| Not ratable / No data coverage                   | Where MSCI considers an asset type for ESG analysis but data on an economic exposure is unavailable due to a lack of data from the data vendor, the investment falls under the category "No data coverage". Where MSCI considers an asset type out of scope for ESG analysis (e.g. Cash, Currency), the economic exposure falls under the category "Not ratable". For further information regarding excluded asset types, please refer to <a href="http://www.msci.com/esg-investing">www.msci.com/esg-investing</a> .  |
| Ongoing Charges                                  | The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from fund fiscal year end and since inception, the ongoing charges figure is based on estimated expenses. After that, the ongoing charges correspond to the TER of the last annual report. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling shares/units in another collective investment undertaking.   |
| Portfolio ESG Rating                             | Discrepancies may exist between the portfolio-level ESG Rating calculated by UBS applying the MSCI methodology (provided in this factsheet) and the ESG Ratings displayed by other providers (e.g., MSCI ESG fund ratings). There are three main reasons for these potential deviations: (1) UBS uses updated month-end holdings data as basis for its calculation, (2) UBS consistently uses underlying issuer data where applicable (e.g., equity issuer in case of a convertible bond), and (3) look-through approach for target funds applied by UBS. The coverage rate is security weighted. For further information on the MSCI methodology, please refer to <a href="http://www.msci.com/esg-investing">www.msci.com/esg-investing</a> .   |
| Proprietary fixed income ESG Signal              | For risk management purposes, the investment manager integrates ESG factors into the security analysis to develop a proprietary waterfall combining ESG ratings of multiple data providers. External data sources considered are Lucror, MSCI, Sustainability, Inrate, Clarity AI and Refinitiv. The rating can yield a "positive", "neutral" or "negative" ESG signal. Where the external providers do not make the necessary data on the issuer available, the ESG signal cannot be computed, and these investments fall into the category "not rated". The proprietary methodology applied by the investment manager is not subject to third party assurance.  |
| QTD  | Quarter-to-date   |
| Sustainable Finance Disclosure Regulation (SFDR) | Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector  |
| Sharpe ratio                                     | The Sharpe ratio gives the excess return per unit of risk (in terms of standard deviation). The higher the ratio, the better the risk-return profile of the fund.   |
| Swing Pricing                                    | A method used to calculate the net asset values of investment funds. Which allows transaction costs arising funds from subscriptions made by incoming investors and redemptions made by outgoing investors to be borne by the incoming and outgoing investors, rather than existing investors.  |
| Sustainable investment objective                 | Where the 'sustainable investment objective' box is ticked, this means that the product implements our investment strategies that allocate capital into companies that offer solutions to society's challenges and meet a sustainable investment objective. The sustainable investment objective is achieved through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG challenges. An unticked box reflects that the product does not aim to meet a sustainable investment objective.   |
| TNA  | Total Net Assets  |
| YTD  | Year-to-date  |

## Warning statements

|                                  |  |
|----------------------------------|--|
| Asset breakdown                  | Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of UBS. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment. |
| Swinging Single Pricing          | For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus  |
| Performance start date           | Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.   |
| PRIIP SRI                        | The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.   |
| Yield to maturity/Yield to worst | The shown yield to maturity/yield to worst is calculated as of 31.10.2024 and does not take into account costs, changes in the portfolio, market fluctuations and potential defaults. The yield to maturity / yield to worst is an indication only and is subject to change.           |

**For marketing and information purposes by UBS.**

UBS Group funds under Luxembourg law.

Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s).

Before investing in a product please read the latest prospectus and key information document carefully and thoroughly.

Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS Group funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations.

Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The details and opinions contained in this document are provided by UBS without any guarantee or warranty and are for the recipient's personal use and information purposes only. This document may not be reproduced, redistributed or republished for any purpose without the written permission of UBS Asset Management Switzerland AG or a local affiliated company. This document contains statements that constitute "forward-looking statements", including, but not limited to, statements relating to our future business development. While these forward-looking statements represent our judgments and future expectations concerning the development of our business, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from our expectations.

**Switzerland:** Representative in Switzerland for UBS funds established under foreign law: UBS Fund Management (Switzerland) AG, P.O. Box, CH-4002 Basel. Paying agent: UBS Switzerland AG, Bahnhofstrasse 45, CH-8001 Zurich. Prospectuses, key information document, the articles of association or the management regulations as well as annual and semi-annual reports of UBS funds are available in a language required by the local applicable law free of charge from UBS Asset Management Switzerland AG, c/o UBS AG, Bahnhofstrasse 45, 8001 Zürich, Switzerland or from UBS Fund Management (Switzerland) AG, P.O. Box, CH-4002 Basel.

**Important information about sustainable investing strategies**

Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and fund construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a fund consisting primarily of sustainable investments may be lower or higher than funds where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment instruments available to such funds may differ. Companies, product issuers and/or manufacturers may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues.

Although UBS Asset Management information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness of any data herein.
