Fund details

Investment Manager	Xavier Lefranc, Marie Paske
Fund launch date	13.02.2020
Share class launch date	02.05.2024
Share class	EB
Share class currency	EUR
Distribution policy	Accumulating
Fund domicile	Luxembourg
ISIN	LU2741081934
Benchmark	MSCI EMU (NR)

The fund was originally launched on 28.01.1994. An umbrella change that took place on 14.02.2020 resulted in a new inception date, new valor and ISINs. For this reference period, the fund had different characteristics and performance was achieved under circumstances that no longer apply. Repositioning as per 14.01.2021

Investment Policy

The fund invests in publicly traded European companies in which a family or an entrepreneur holds a substantial portion of outstanding voting rights. These companies are important incubators for innovation in Europe. Thanks to their sound management practices, long-term investment horizon, and a holistic approach to running their businesses, they offer sustainable growth potential and resilience to crisis. Following an active investment approach, the fund aims at long-term capital appreciation while maintaining appropriate diversification of risk.

Investing involves risk including the risk of loss of capital.

Performance overview

According to MiFID standards (Markets in Financial Instruments Directive) no performance figures shall be made available to investors if the product was launched less than twelve months ago.

¹ If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations. The individuals mentioned above only conduct regulated activities in the jurisdiction(s) where they are properly licensed, where relevant. ESG stands for environmental (E), social (S), and governance (G). Please find the definition of all the acronyms/terms used in this document in the Glossary. Additional important information can be found at the end of the document.

Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- **Credit risk:** Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments generally have low credit risk.
- **Liquidity risk:** Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- **Operational risk:** Deficient processes, technical failures or catastrophic events may cause losses.
- **Political and Legal risks:** Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- **Sustainability risks:** Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

Investors may lose part or all of their invested amount. The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only. Any decision to invest should take into account all the characteristics or objectives of the promoted fund as described in its prospectus, or similar legal documentation.

Risk profile²

PRIIP SRI

Larger values (up to 7) indicate higher risk while lower values (up to 1) indicate lower risk.

Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Performance commentary

The fund outperformed the benchmark during the quarter, driven by strong stock selection in the information technology, consumer discretionary and energy sectors. Our overweight in IT also positively contributed, offsetting negative performance stemming from our overweight in consumer staples. At the single-stock level, the top contributor to performance during Q4 was ASML, the leading supplier of lithography equipment to the semiconductor industry, which was a position we increased in November after the stock sold off following the lowering of their full-year revenue guidance from EUR 35–40 billion to EUR 30–35 billion. We met up with Roger Dassen, ASML's CFO, post-profit warning and came away reassured that the long-term structural growth story remains intact, giving us the conviction to increase the position despite near-term headwinds and unusually low visibility. On the other hand, one of the largest detractors was CTS Eventim, a ticketing and live entertainment event management company, which gave back some of the prior year-to-date gains after reporting softer Q3 results. While revenues rose +13% year-on-year, adjusted EBITDA fell -8% year-on-year, missing consensus expectations due to a mix of integration costs and tough comparatives.

² The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

Market comments

In a year characterised by significant geopolitical uncertainties, with more than 70 elections held throughout 2024, covering half of the world's population, it was no surprise that politics remained front and centre in Q4. The decisive Donald Trump victory in the US presidential election was the dominant market driver in November, buoying US-exposed equities, given the expectation of fiscal expansion. Meanwhile, France remained in political limbo following a no-confidence vote and the collapse of the government, which saw the spread between French and German 10-year bond yields on a par with Greece. New elections cannot be called until July 2025 at the earliest, leaving the French parliament gridlocked and fiscal accounts on a challenging trajectory. Political turmoil also unexpectedly hit South Korea when the president declared martial law in a desperate attempt to undermine the rights of an adversarial parliament. The acute crisis was quickly resolved, and most markets shrugged it off, though the Korean Won depreciated. Across the eurozone, economic sentiment remained weak throughout Q4, with manufacturing sector PMIs in contractionary territory. However, services PMIs ticked higher in December. Elsewhere, intensifying fighting and further escalations between Russia and Ukraine, coupled with cold weather, drove European gas prices even higher. We expect an increase in volatility following the US election given some of the policy uncertainties ahead of Trump's inauguration, both in the US and on the geopolitical front. However, while we are macro-aware, we are not macro-driven. We manage tail risk by focusing on idiosyncratic drivers of performance and have built a high-conviction portfolio using diversified sources of alpha, drawing on the expertise of our internal analysts. Our preference for high-quality companies with strong management teams and healthy balance sheets should position us well to weather the uncertain economic outlook and help protect against downside risk. We commit to meeting all of our holdings' management teams at least once per year and stay away from investing in companies where management is reluctant to engage with investors. We intend to remain fully invested through the cycle.

Comments on transactions

Throughout the quarter, we took profits in Lotus Bakeries and Credito Emiliano and reallocated cash to European luxury names such as LVMH. We like LVMH as the company displays most of the key attributes required to deliver exceptional value over the long term: it operates in a market with compelling structural growth drivers and owns a uniquely rich and diversified portfolio of brands, which puts it in a prime position to make the most of the global luxury market opportunity. We are all the more confident in the long-term potential of LVMH given the management team's long-term track record.

This commentary is intended only to describe past performance of the investment strategy. The strategy invests in individual securities which are owned in the strategy as part of a carefully constructed and diversified portfolio. The information presented in this commentary may be based on the assessment of UBS' portfolio managers. Market developments described in this document are subject to a number of risks and uncertainties and are neither reliable indicators nor a guarantee of future results/performance. The information in this commentary may change after the date of issuance of this document without notice and should not be construed as a recommendation to buy or sell individual securities named herein.

ESG Approach

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector). It applies the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg), including norms-based, values-based and business conduct exclusions, to combine ESG factors with traditional financial analysis to make an ESG adjusted risk-return assessment, which serves as the basis for the portfolio construction. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit www.credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process. For details about the fund's ESG decision-making process, please refer to the fund's prospectus.

ESG Characteristics

ESG Benchmark	Exclusion Criteria	ESG Integration	Active Ownership ⁵	Sustainable Investment Objective
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

³ CS Product Sustainability Classifications and SFDR Article are valid at the time of publishing and may be subject to change.

⁴ If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.

⁵ Active Ownership is part of the fund's strategy to act in the best interests of its investors and to preserve and optimize the long-term value of their investments. To promote best practices and to ensure that the investee companies are sustainable and successful in the long term, Active Ownership is designed to influence the investee companies on two levels: first, through proxy voting, and second, through engagement. In the case of investments in other funds (Target Funds), the fund has no or only limited ability to exercise Active Ownership on the Target Fund, resp. on the Target Funds' investee companies.

ESG Overview

According to MSCI methodology. Fund performance against benchmark: MSCI EMU (NR).

	Portfolio	Benchmark
ESG Rating	AA	AA
ESG Quality score	7.87	7.81
Environmental score	6.26	6.87
Social score	5.80	5.31
Governance score	6.31	6.45
Coverage for Rating/Scoring	95.43%	99.91%
Weighted Average Carbon Intensity (Tons of CO2e/\$M sales)	72.07	82.97
Coverage for Carbon Intensity	95.43%	99.91%

Note: The total carbon intensity figure shown in this section may be higher than the total in the breakdown graph. This is because the figure is normalized, and actual weights are inflated because of limited data coverage. For further information on the MSCI methodology for the above listed ESG data points, please refer to the glossary.

Top 10 positions - ESG Characteristics

In terms of the fund's total economic exposure. Certain data points disclosed in this table are provided for mere transparency purposes and are not linked to a specific ESG investment process. For details about the fund's ESG decision-making process, please refer to the fund's prospectus. Source: MSCI

Instrument Name ⁶	Weight in portfolio	GICS sector	MSCI ESG Rating	Controversy flag	Carbon intensity (tCO2e / \$M sales)
ASML HOLDING NV	7.27%	Information Technology	AAA	Green	1.15
SAP	7.08%	Information Technology	AAA	Yellow	7.00
CTS EVENTIM AG	3.88%	Communication	A	Yellow	16.97
HERMES INTERNATIONAL	3.85%	Consumer Discretionary	AA	Yellow	2.53
BANCA MEDIOLANUM	3.80%	Financials	AA	Green	3.00
HANNOVER RUECK	3.78%	Financials	A	Green	0.10
LVMH	3.43%	Consumer Discretionary	A	Yellow	2.28
LOREAL SA	3.24%	Consumer Staples	AA	Orange	2.08
RATIONAL AG	3.22%	Industrials	BBB	Green	2.67
ESSILORLUXOTTICA SA	2.93%	Health Care	AAA	Yellow	33.99

Note: All ESG data points in the table refer to an underlying issuer as applicable (e.g., an equity issuer in case of a convertible bond). For further information on the methodology for the above listed ESG data points, please refer to the glossary.

Asset breakdown by ESG rating

In % of total economic exposure. Fund performance against benchmark: MSCI EMU (NR). Source: MSCI ESG rating

	Portfolio	Benchmark	Portfolio Benchmark

AA	34.36	37.55	
A	19.71	21.74	
BBB	5.51	5.98	
BB	3.00	3.85	
B	1.54	1.06	
CCC	-	-	
Not ratable	3.17	-	
No data coverage	1.41	0.09	

Note: For further information on MSCI's ESG rating methodology and the difference between categories "not ratable" and "no data coverage", please refer to the glossary.

Carbon emission intensity contribution by GICS sector

Tons of CO2 equivalent emission intensity (GHG scopes 1 & 2) per \$m sales, by GICS sector split. Fund performance against benchmark: MSCI EMU (NR). Source: MSCI

	Portfolio	Benchmark	Portfolio Benchmark
Materials	49.39	39.14	
Others	5.78	13.05	
Utilities	5.71	22.15	
Energy	5.23	7.04	
Health Care	2.68	1.52	
Total	68.78	82.89	

Note: Security weighted data coverage is 95.43% for the portfolio. The total shown in this section may be lower than the one in the 'ESG Overview' section. This is because the figures in this breakdown are not normalized and use the actual weights. For further information on the Carbon emission intensity, please refer to the glossary.

Asset breakdown by ESG controversy flag

In % of fund total economic exposure to investee companies. Fund performance against benchmark: MSCI EMU (NR). Source: MSCI

	Portfolio	Benchmark	Portfolio Benchmark
Green	56.22	30.18	
Yellow	35.41	46.69	
Orange	3.80	23.13	
Red	-	-	
No data coverage	1.41	-	

Note: Exposure to investee companies represents 96.83% of portfolio weight for this share class. MSCI only provides data on ESG controversies for corporate issuers. Any remaining instruments (e.g., government bonds) are excluded from this breakdown. For further information on MSCI's ESG controversy flag methodology, please refer to the glossary.

⁶ This is an indicative allocation which may change over time. This product is not a direct investment the collaterals displayed above. As a result, it does not reflect the actual performance of the product either positively or negatively. The individual entities and/or instruments mentioned on this page are meant for illustration purposes only and are not intended as a solicitation or an offer to buy or sell any interest or any investment.

Glossary

Accumulating	Indicates a regular reinvestment of the dividends received in the portfolio itself
Beta	A measure of the volatility, or systematic risk, of a single security or fund in comparison to the market as a whole.
Carbon emission intensity	The weighted average emissions intensity, which is provided by MSCI ESG, divides the Scopes 1 & 2 emissions in tons of CO ₂ -equivalent by million \$ sales. Intensities are broken down by GICS sector and are security weighted.
ESG aware	This product undertakes investments that explicitly assess and integrate the sustainability characteristics of companies in the investment process.
ESG benchmark	A ticked 'ESG benchmark' box reflects that the ESG section in this document compares the ESG performance of the portfolio with an ESG index. In case the box is not ticked, this means that the ESG section in this document compares the ESG performance of the portfolio with a non-ESG index or that no comparison is performed due to a lack of a recognized benchmark. The investor shall read the legal documentation of the Fund to understand how the benchmark is used. In any case, a ticked 'ESG benchmark' box does not mean that the ESG benchmark is used to attain the ESG strategy of the fund.
ESG Controversy Flag	ESG Controversy Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. Controversy flags can be red, orange, yellow or green. Red indicates that a company is involved in one or more very severe controversies. Orange indicates that a company has been involved in one or more recent severe structural controversies that are ongoing. Yellow indicates that the company is involved in severe-to-moderate level controversies. Green indicates that the company is not involved in any major controversies. For further information on the methodology, please refer to www.msci.com/esg-investing .
ESG Quality score	The ESG Quality score, based on MSCI ESG scores of underlyings, is measured on a scale from 0 (very poor) to 10 (very good). It does not correspond directly to the underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the portfolio ESG Quality score is adjusted by MSCI to reflect the industry-specific level of ESG risk exposure. As Pillar scores are absolute, and the portfolio ESG Quality score is relative, the first cannot be averaged to derive the latter. The coverage rate is security weighted.
Issuer ESG Rating	Company and Government ESG Ratings, which are provided by MSCI ESG, are measured on a scale from AAA (highest rating) to CCC (lowest rating). Company ESG Ratings are based on the issuer's exposure to industry specific ESG risks and its ability to mitigate those risks relative to peers. Company ESG Ratings are calculated on an industry relative basis while the underlying individual E, S and G Ratings are absolute. Hence, the ESG Rating cannot be seen as an average of the individual E, S and G Ratings. Government ESG Ratings identify a country's exposure to and management of ESG risk factors and explain how these factors might impact the long-term sustainability of its economy. They are derived from 0-10 scores on underlying factors in the E, S and G pillars. For further information on the MSCI methodology, please refer to www.msci.com/esg-investing .
GICS	Global Industry Classification Standard
Greenhouse gas (GHG) emissions	Scope 1 emissions are generated by a company directly from owned or controlled sources such as the burning of fuels (stationary or mobile), industrial processes, etc. Scope 2 emissions are indirect emissions, primarily those associated with the electricity consumed by a company. Scope 3 emissions are all other indirect emissions associated with a company's operations, such as business travel, waste generated, and products both upstream (in the supply chain) and downstream (use of the products and end of life). Scope 3 emissions typically account for the largest proportion of a company's emissions.
MSCI	MSCI refers to the external data provider MSCI ESG Research LLC and/or its affiliates.
MSCI ESG Methodology	For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to www.msci.com/esg-investing .
NAV	Net Asset Value
Not ratable / No data coverage	Where MSCI considers an asset type for ESG analysis but data on an economic exposure is unavailable due to a lack of data from the data vendor, the investment falls under the category "No data coverage". Where MSCI considers an asset type out of scope for ESG analysis (e.g. Cash, Currency), the economic exposure falls under the category "Not ratable". For further information regarding excluded asset types, please refer to www.msci.com/esg-investing .
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from fund fiscal year end and since inception, the ongoing charges figure is based on estimated expenses. After that, the ongoing charges correspond to the TER of the last annual report. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling shares/units in another collective investment undertaking.
Portfolio/Benchmark ESG Rating	Discrepancies may exist between the portfolio-level ESG Rating calculated by UBS applying the MSCI methodology (provided in this factsheet) and the ESG Ratings displayed by other providers (e.g., MSCI ESG fund ratings). There are three main reasons for these potential deviations: (1) UBS uses updated month-end holdings data as basis for its calculation, (2) UBS consistently uses underlying issuer data where applicable (e.g., equity issuer in case of a convertible bond), and (3) look-through approach for target funds applied by UBS. The coverage rate is security weighted. For further information on the MSCI methodology, please refer to www.msci.com/esg-investing .
Sustainable Finance Disclosure Regulation (SFDR)	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector
Swing Pricing	A method used to calculate the net asset values of investment funds. Which allows transaction costs arising funds from subscriptions made by incoming investors and redemptions made by outgoing investors to be borne by the incoming and outgoing investors, rather than existing investors.
Sustainable investment objective	Where the 'sustainable investment objective' box is ticked, this means that the product implements our investment strategies that allocate capital into companies that offer solutions to society's challenges and meet a sustainable investment objective. The sustainable investment objective is achieved through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG challenges. An unticked box reflects that the product does not aim to meet a sustainable investment objective.
TNA	Total Net Assets

Warning statements

Asset breakdown	Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of UBS. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment.
Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.

For marketing and information purposes by UBS.

For professional clients / qualified investors only.

UBS Group funds under Luxembourg law.

Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s).

Before investing in a product please read the latest prospectus and key information document carefully and thoroughly.

Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS Group funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations.

Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The details and opinions contained in this document are provided by UBS without any guarantee or warranty and are for the recipient's personal use and information purposes only. This document may not be reproduced, redistributed or republished for any purpose without the written permission of UBS Asset Management Switzerland AG or a local affiliated company. Prospectuses, key information document, the articles of association or the management regulations as well as annual and semi-annual reports of UBS funds are available in a language required by the local applicable law free of charge from UBS Asset Management Switzerland AG, c/o UBS AG, Bahnhofstrasse 45, 8001 Zürich, Switzerland or from UBS Fund Management (Switzerland) AG, P.O. Box, CH-4002 Basel.

Important information about sustainable investing strategies

Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and fund construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a fund consisting primarily of sustainable investments may be lower or higher than funds where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment instruments available to such funds may differ. Companies, product issuers and/or manufacturers may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues.
