Investment Policy

The fund assets are invested in companies which offer impactful solutions with the potential to generate positive impact towards tackling environmental challenges. The investable universe is broken down into four sub-groups: sustainable infrastructure, resources, waste mitigation and carbon reduction technologies. The investment objective is long-term capital appreciation from actively managed exposure to this emerging secular market potential for solution oriented companies.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

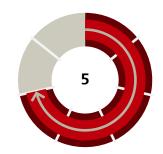

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments
 generally have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This
 includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of
 property rights or other legal risks.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

Investors may lose part or all of their invested amount. The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only. Any decision to invest should take into account all the characteristics or objectives of the promoted fund as described in its prospectus, or similar legal documentation.

² The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Performance commentary

The fund lagged the benchmark in October, mainly driven by weakness in industrials and materials names. From our sub-themes, waste mitigation and resources were the weakest performers, with Biotage and Valmet underperforming in the former. Biotage, specialised in workflow efficiency for laboratory research processes, posted solid Q3 results with impressive growth for its large molecule business, but a modest decrease for group gross margin vs Q2. However, the company considers this to be temporary and expects to see an improvement as early as the fourth quarter again (Q3 2024 earnings call, 23.10.2024). Valmet posted softer results in line with the earlier profit warning, but order intake remained strong in the quarter, and following the results the company confirmed the earlier announced order from the world largest pulp mill of more than EUR 1bn, adding to capacity utilisation from 2025 onwards (Valmet, 29.10.2024). In resources, Novonesis and Vestas delivered sluggish performance. The former is due to report quarterly results in November but consolidated somewhat after the outperformance over the last months. Vestas traded lower mainly due to cautious analyst comments ahead of the US elections and potential implications for the growth in US onshore Wind. Performance for Carbon Reduction Technologies was better, mainly driven by MYR Group and Chroma ATE. MYR Group delivered a beat for the quarter with stronger-than-expected margins despite a revenue shortfall and more importantly confirmed to be on track to complete renewable energy projects that caused margin pressure in the recent past in the upcoming 4th quarter (Q3 2024 earnings call, 31.10.2024). Chroma ATE outperformed on continuous order momentum for artificial intelligence (AI) testing equipment and the developing opportunity around its new metrology tools (UBS, 31.10.2024).

Market comments

Stock markets traded lower in October with the small-cap Russell 2000 index lagging large caps (Bloomberg). While US economic growth continued to show remarkable resilience, amid robust labour markets and normalising inflation, disappointing earnings from mega caps brought indices down on the last trading day (UBS, CIO View: Global equities, 24.10.2024). Chinese markets had a strong start to the month on the earlier announced fiscal stimulus plans but traded lower in the following as investors waited for more clarity on the government plan to revive the fragile economy, which is expected to be announced around the National People's Congress from 4 to 8 November (Reuters, 29.10.2024). As announced earlier, the EU imposed tariffs on Chinese electric vehicles (EVs), peaking at up to 45% in October. Given the risk of retaliation from China the bloc was divided on this measure, as European car manufacturers are already facing weakness in home markets and significant market share losses in China (Reuters, 30.10.2024). High-profile news flow about Germany's biggest carmaker, Volkswagen, to consider shutting three factories and cutting pay by 10% due to losing market share to local EV brands in China, underlined how the transition to EVs is creating fundamental issues for legacy original equipment manufacturers (Guardian, 28.10.2024).

Comments on transactions

In October we kept our positions largely unchanged. We initiated a position in UK-based IMI plc, as we believe the company's efficiency related product portfolio will benefit from growing demand around electrification and leakage prevention solutions (e.g.: related to ship engine propulsion, methane leakage). The company's high-specification valves are critical for customers to achieve productivity improvements, which is gaining importance amid the need to efficiently manage flow control in respective industrial and energy-related applications.

This commentary is intended only to describe past performance of the investment strategy. The strategy invests in individual securities which are owned in the strategy as part of a carefully constructed and diversified portfolio. The information presented in this commentary may be based on the assessment of UBS' portfolio managers. Market developments described in this document are subject to a number of risks and uncertainties and are neither reliable indicators nor a guarantee of future results/performance. The information in this commentary may change after the date of issuance of this document without notice and should not be construed as a recommendation to buy or sell individual securities named herein.

ESG Approach

This fund has sustainable investments as a primary investment objective (within the meaning of Art. 9 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector). The objective is attained through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG (environmental, social and governance) challenges according to the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg), including norms-based, values-based and business conduct exclusions. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit www.credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process. For details about the fund's ESG decision-making process, please refer to the fund's prospectus.

ESG Overview

According to MSCI methodology. Fund performance against benchmark: MSCI World ESG Leaders (NR).

| | Portfolio | Benchmark |
|--|-----------|-----------|
| ESG Rating | AA | AA |
| ESG Quality score | 7.37 | 7.89 |
| Environmental score | 5.79 | 6.53 |
| Social score | 5.14 | 5.60 |
| Governance score | 6.50 | 5.93 |
| Coverage for Rating/Scoring | 99.10% | 100.00% |
| Weighted Average Carbon Intensity (Tons of CO2e/\$M sales) | 100.16 | 61.64 |
| Coverage for Carbon Intensity | 99.10% | 99.79% |
| | | |

Note: The total carbon intensity figure shown in this section may be higher than the total in the breakdown graph. This is because the figure is normalized, and actual weights are inflated because of limited data coverage. For further information on the MSCI methodology for the above listed ESG data points, please refer to the glossary.

⁴ CS Product Sustainability Classifications and SFDR Article are valid at the time of publishing and may be subject to change. ⁵ If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.

If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.

Active Ownership is part of the fund's strategy to act in the best interests of its investors and to preserve and optimize the long-term value of their investments. To promote best practices and to ensure that the investee companies are sustainable and successful in the long term, Active Ownership is designed to influence the investee companies on two levels: first, through proxy voting, and second, through engagement. In the case of investments in other funds (Target Funds), the fund has no or only limited ability to exercise Active Ownership on the Target Fund, resp. on the Target Funds' investee companies.

UBS Group funds under Luxembourg law

Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s)

Before investing in a product please read the latest prospectus and key information document carefully and thoroughly.

Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS Group funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations.

Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference

Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. Box, CH-4002 Basel.

Important information about sustainable investing strategies

Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and fund construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a fund consisting primarily of sustainable investments may be lower or higher than funds where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment instruments available to such funds may differ. Companies, product issuers and/or manufacturers may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues.

Although UBS Asset Management information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness of any data herein. None of the ESG Parties makes any express or implied warranties of any kind, and the ESG Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to any data herein. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein. Further, without limiting any of the foregoing, in no event shall any of the ESG Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Certain information contained herein (the "Information") is sourced from/copyright of MSCI ESG Research LLC (a Registered Investment Adviser under the Investment Advisers Act of 1940), or its affiliates (including MSCI Inc. and its subsidiaries ("MSCI")), or third party suppliers (together with MSCI & MSCI ESG, the "ESG Parties") and may have been used to calculate scores, ratings or other indicators. It may not be reproduced or redisseminated in whole or part without prior written permission.
