Investment Policy

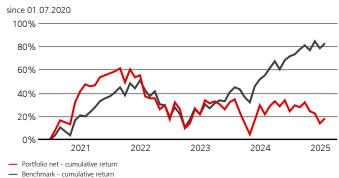

The fund assets are invested in companies which offer impactful solutions with the potential to generate positive impact towards tackling environmental challenges. The investable universe is broken down into four sub-groups: sustainable infrastructure, resources, waste mitigation and carbon reduction technologies. The investment objective is long-term capital appreciation from actively managed exposure to this emerging secular market potential for solution oriented companies.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

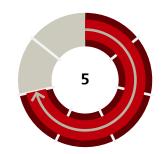

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments
 generally have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This
 includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of
 property rights or other legal risks.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

Investors may lose part or all of their invested amount. The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only. Any decision to invest should take into account all the characteristics or objectives of the promoted fund as described in its prospectus, or similar legal documentation.

³ The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Performance commentary

In January, the fund outperformed the benchmark given the strength in green buildings names and the weakness of big tech stocks in the benchmark. The best contribution came from the Sustainable Infrastructure subtheme, driven by outperformance of Acuity Brands and Installed Building Products. Energy-efficient lighting provider Acuity was up after reporting solid execution, leading to better-than-expected margin performance in the first quarter. Furthermore, the company raised its guidance due to expected cross-sales opportunities from recent acquisitions (Q1 2025 Earnings Call, 08.01.2025). Performance in carbon reduction technologies was mixed, with Nordic Semiconductor outperforming, while Chroma ATE was down. Nordic rebounded from de-risked valuation levels helped by constructive results from Logitech, which was read as a positive indicator for improving underlying consumer electronics demand (Bloomberg, 29.01.2025). Chroma ATE, a Taiwanese provider of measuring instruments for electric vehicle (EV) batteries, graphics processing units (GPUs) and metrology tools, traded down in January, after strong sales results, but concerns over potential hiccups in short-term order flows. Waste mitigation and resources performed better. For the former: Verallia and Valmet contributed the most on the positive side, while Biotage lagged the market. The stock of French packaging provider Verallia jumped at the end of the month after news suggested a potential buyout by its largest shareholder (Bloomberg, 31.01.2025) is underway. Biotage was down in January after sell-side analysts lowered near-term guidance due to tough comparisons vs the strong 2024 sales figures. Resources was up, driven by gains in US forest company PotlatchDeltic after a 4Q beat, positive comments on the lumber cycle and more details around its lithium and solar-related lease agreement pipeline.

Market comments

Stock markets moved higher in the first month of the year. The tech-heavy Nasdaq (+1.66%) underperformed the S&P 500 Index (+2.78%), after the Chinese start-up DeepSeek unveiled an affordable large language model, leading to a sell-off in US tech and artificial intelligence (AI) infrastructure-related sectors (Bloomberg, 31.01.2025). The claim that the model was trained at a fraction of the cost and using less sophisticated chips suggested that future AI models could be less capex and resource-intensive than previously estimated. This narrative led to a sell-off in chip equipment suppliers and electricity and power-related names. However, current AI capex plans of hyperscalers remain unchanged for now, given near-term AI capacity constraints (Microsoft earnings call, 29.01.2025). Furthermore, in support of energy- related AI infrastructure build-out, lower battery prices have reportedly created a wave of connection requests for large battery storage systems in several countries.

On the policy front, markets prepared for an upcoming tariff announcement from the new US administration and potential retaliation from targeted countries. Fed chair Jerome Powell stated that the Fed can afford to be patient regarding further rate cuts (Washington Post, 29.01.2025), although investors believed a wider trade war could bring inflation back to 2023 levels and override current rate cut expectations. In Europe, 2025 marks a milestone with significantly stricter emission targets for cars, which could drive an increase in battery electric vehicles (BEV) registrations of over 40% vs the sluggish trends seen in 2024 according to market data. However, given the unclear demand picture in Europe and the potential financial burden for European original equipment manufacturers (OEMs) for failing to meet the new 93.6 grams of CO2/km average fleet limit, European Commission chief Ursula von der Leyen and auto sector executives debated ways this month to help EU car producers to electrify their fleets or potentially relax fines. (Euronews, 20.01.2025) A final plan will be published on 5 March and might bring more clarity for the sector and related suppliers (Reuters, 30.01.2025).

Comments on transactions

In January, we left our positioning largely unchanged. We initiated a new position in Envipco, a leading reverse vending machine (RVM) technology company that is set to benefit from the roll-out of several new deposit markets on the back of the EU Single-Use Plastics Directive, in our view. To fulfil collection targets for plastic beverage bottles of 77% and 90% in 2025 and 2029 respectively, automated collection solutions are expected to see a rise in demand in the coming years (European Commission, 07.10.2021). Envipco is an experienced market player but has only recently started to actively participate in European markets, with impressive order wins in new RVM markets such as Hungary.

This commentary is intended only to describe past performance of the investment strategy. The strategy invests in individual securities which are owned in the strategy as part of a carefully constructed and diversified portfolio. The information presented in this commentary may be based on the assessment of UBS' portfolio managers. Market developments described in this document are subject to a number of risks and uncertainties and are neither reliable indicators nor a guarantee of future results/performance. The information in this commentary may change after the date of issuance of this document without notice and should not be construed as a recommendation to buy or sell individual securities named herein.

ESG Approach

This fund has sustainable investments as a primary investment objective (within the meaning of Art. 9 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector). The objective is attained through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG (environmental, social and governance) challenges according to the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg), including norms-based, values-based and business conduct exclusions. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit www.credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process. For details about the fund's ESG decision-making process, please refer to the fund's prospectus.

⁷ Active Ownership is part of the fund's strategy to act in the best interests of its investors and to preserve and optimize the long-term value of their investments. To promote best practices and to ensure that the investee companies are sustainable and successful in the long term, Active Ownership is designed to influence the investee companies on two levels: first, through proxy voting, and second, through engagement. In the case of investments in other funds (Target Funds), the fund has no or only limited ability to exercise Active Ownership on the Target Fund responsible to the Target Funds.

Ownership on the Target Fund, resp. on the Target Funds' investee companies.

Important information about sustainable investing strategies

Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and fund construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a fund consisting primarily of sustainable investments may be lower or higher than funds where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment instruments available to such funds may differ. Companies, product issuers and/or manufacturers may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues.

Although UBS Asset Management information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness of any data herein. None of the ESG Parties makes any express or implied warranties of any kind, and the ESG Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to any data herein. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein. Further, without limiting any of the foregoing, in no event shall any of the ESG Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Certain information contained herein (the "Information") is sourced from/copyright of MSCI ESG Research LLC (a Registered Investment Adviser under the Investment Advisers Act of 1940), or its affiliates (including MSCI Inc. and its subsidiaries ("MSCI")), or third party suppliers (together with MSCI & MSCI ESG, the "ESG Parties") and may have been used to calculate scores, ratings or other indicators. It may not be reproduced or redisseminated in whole or part without prior written permission. The Information has not been submitted to, nor received approval from, the US SEC or any other regulatory body. The Information may not be used to create any derivative works, or in connection with, nor does it constitute, an offer to buy or sell, or a promotion or recommendation of, any security, financial instrument or product, trading strategy, or index, nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Some funds may be based on or linked to MSCI indexes, and MSCI may be compensated based on the fund's assets under management or other measures. MSCI has established an information barrier between equity index research and certain Information. None of the Information and of itself can be used to determine which securities to buy or sell or when to buy or sell them. The Information is provided "as is" and the user assumes the entire risk of any use it may make or permit to be made of the Information. No ESG Party warrants or guarantees the originality, accuracy and/or completeness of the Information and each expressly disclaims all express or implied warranties. No ESG Party shall have any liability for any errors or omissions in connection with any Information herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.
