Investment Policy

The Subfund is an actively managed, globally investing mixed asset class fund with flexible allocation to the different investment categories. The investments will be biased towards investment categories showing above average yield and the focus lies on regular, steady payouts. The weighting of the individual investment categories may vary over time according to the investment manager's market expectations so that the Subfund may be highly concentrated in any asset class at any time.

Fund details

Investment Manager	Sacha Widin, Robin Gottschalk
Fund launch date	22.09.2014
Share class launch date	24.07.2019
Share class	IAH
Share class currency	CHF
Distribution policy	Distributing
Fund domicile	Luxembourg
ISIN	LU2029718652

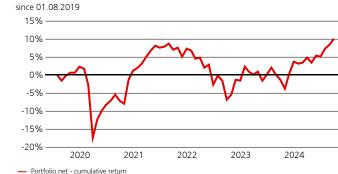

The distribution target is not guaranteed. Please see more information after Potential Risks section for more details.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Performance commentary

In the last week of the month, China's central bank eased its monetary policy on a scale that took markets by surprise. The Politburo followed suit, vowing to step up fiscal spending by easing of mortgage rules and other large-scale efforts in order to achieve the country's growth target of 5%. This triggered a spectacular rally and dominated the headlines of the last days. Currently, it is too early to assess whether this represents a sustainable turning point to China's slowing economic momentum.

Market comments

Equity markets are approaching the end of the third quarter in high spirits. The S&P 500 struck a new all-time high after the Federal Reserve (Fed) opted for a rate cut by 50 basis points. While it constitutes a larger move than adopted by other top central banks, Fed Chair Powell reassured investors that the US economy appears headed for a soft landing. The decision to kick off monetary easing with a "good strong start" was possible due to greater confidence that inflation was headed sustainably back to the 2% target. With just over six weeks until Election Day, the US presidential race appears like it may go down to the wire. Polling margins in key swing states are within the statistical margin of error. In the houses of Congress, the race may be less finely balanced. The most likely outcome, a divided Congress, is important insofar as it limits the legislative scope of the future president and could flip the market focus back onto corporate earnings, economic growth and Fed policy.

Comments on positioning

The equity quota stands at around 53% (including preferred shares), main weights are in the eurozone and the US. Fixed income represents around 41%, with main holdings in emerging markets hard currency and USD bonds. Infrastructure is around 2% of the fund, real estate approximately 2% as well. The USD exposure is around 90% of the fund.

Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments
 have considerable credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Event risk: In the case a trigger event occurs contingent capital is converted into equity or written down and thus may loose substantially in value.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This
 includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of
 property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased
 operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions can have a
 material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only. Any decision to invest should take into account all the characteristics or objectives of the promoted fund as described in its prospectus, or similar legal documentation.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and/or current market conditions and are not an exact indicator. What you will get will vary depending on how the market performs and how long you keep the investment/product. Future performance might also be subject to taxation, which depends on the personal situation of each investor and which may change in the future. An investment may lead to a financial loss.

The distribution target of 5% p.a. is not guaranteed. The fund management may decide to make a partial repayment provided that all income and realized capital gains from the most recent full financial year and the preceding financial years have been fully distributed.

Target return is not a projection, prediction, or guarantee of future results.

While UBS believes that the assumptions upon which such targeted returns are based are reasonable, such targeted returns are not necessarily a valid guide to future performance, and the actual results may differ from any performance targets set forth in this document. The targeted return objective is based on the manager's analysis and evaluation of investment opportunities and on numerous investment-specific assumptions that may not be consistent with future market conditions and that may significantly affect actual investment results. Each of these assumptions may involve a significant element of subjective judgment and may be adversely affected by post-investment changes in market conditions. Material assumptions include expected coupons, yield levels and dividend policy of the underlying assets in the portfolio, expected taxes and costs borne by the fund investors, and the general development of market interest rates and the market investment cycle. The attention of investors is drawn to material limitations of such assumptions. Historical data that provides the foundation for the target return is derived over a limited or possibly unrepresentative market cycle. It is further emphasized that if one or more of the underlying assumptions upon which the targeted returns are based are incorrect, actual returns may differ from the targeted returns. Historical data provide the basis for target return to some extent. However, past performance is not a guarantee or indicator of future performance. The target return presented is meant for reference only, and may be amended, modified or superseded at any time. Every investor is urged to personally verify the accuracy of target return investment decision. There can be no assurance that all relevant factors in establishing the targeted returns have been taken into account or that the assumptions are accurate in light of actual changes in the market and/or economic conditions affecting the investments.

Risk profile⁶

Larger values (up to 7) indicate higher risk while lower values (up to 1) indicate lower risk.

⁵ This is an indicative allocation which may change over time. This product is not a direct investment the collaterals displayed above. As a result, it does not reflect the actual performance of the product either positively or negatively. The individual entities and/or instruments mentioned on this page are meant for illustration purposes only and are not intended as a solicitation or an offer to buy or sell any interest or any investment.

The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

Glossary

Annualized risk	Annualized risk is a statistic, which is used to measure the risk of a fund by describing the range of returns, which were achieved in the observation period are most likely to be achieved. Greater volatility implies greater risk.
Annualized return	A measure of how much an investment has increased on average each year during a specific period.
Distributing	Payment of an investment fund to distribute the income generated to its unit holders.
Ex post	Refers to metrics based on historical data
ITD	Inception-to-date
Maximum drawdown	Represents the worst possible result (in percentage terms) that occurred during the period being analyzed.
MTD	Month-to-date
NAV	Net Asset Value
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from fund fiscal year end and since inception, the ongoing charges figure is based on estimated expenses. After that, the ongoing charges correspond to the TER of the las annual report. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling shares/units in another collective investment undertaking.
QTD	Quarter-to-date
Sustainable Finance Disclosure Regulation (SFDR)	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector
Sharpe ratio	The Sharpe ratio gives the excess return per unit of risk (in terms of standard deviation). The higher the ratio, the better the risk-return profile of the fund.
Swing Pricing	A method used to calculate the net asset values of investment funds. Which allows transaction costs arising funds from subscriptions made by incoming investor and redemptions made by outgoing investors.
TNA	Total Net Assets
YTD	Year-to-date

Warning statements

Asset breakdown	Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of UBS. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment.
Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus
Performance start date	Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.
Yield to maturity/Yield to worst	The shown yield to maturity/yield to worst is calculated as of 30.09.2024 and does not take into account costs, changes in the portfolio, market fluctuations and potential defaults. The yield to maturity / yield to worst is an indication only and is subject to change.

Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s).

Before investing in a product please read the latest prospectus and key information document carefully and thoroughly.

Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS Group funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration. (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations.

Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future.
