

Swisscanto (LU) Equity Fund Small & Mid Caps Japan AT EUR

Equity | reinvesting | June 2024 - Marketing Material

Fund Description

The fund invests primarily in equities of small and medium-sized Japanese companies using a bottom-up analysis, also taking into account ESG criteria. Moreover, the fund excludes various fields such as oil and gas as well as coal extraction (>10% revenue) and controversial weapons. Foreign currency investments are not systematically hedged against the EUR.

Profile/Suitability

This product is suitable for investors who

- have at least a medium-term investment horizon.
- would like to participate in the development of small and mid-cap Japanese companies.
- would like to benefit from a smaller ecological footprint compared to the benchmark.
- are interested in high capital growth.
- are willing to accept large price fluctuations.

Portfolio Data

	Fund	BM
Number of Positions	66	2'038
Number of direct investments	66	n.a.
Effective Cash	3.35%	n.a.

¹ Year/period: Since start performance calculation or at the longest for the last five years/periods.

² Minor deviations can be caused by rounding errors.

^a The performance shown is less all regular fund fees incurred. Further potential costs incurred, which can be directly charged to the fund assets, are disclosed in the fund prospectus.

^b The gross performance indicated is before deduction of any regular fund fees incurred.

The performance stated refers to the past and is not a reliable indicator of future results. The calculation is made in the reference currency of the share class. Performance in other currencies may rise or fall as a result of currency exchange rate fluctuations. The performance data assume that any dividends will be reinvested. The data take into account the costs incurred at fund level (such as administrative fees).

The net performance including issue surcharge represents the performance after deduction of fees, but takes into account the maximum issue surcharge incurred of 5.00%.

Comments to the Fund

Target Investor Group - Term

All Investors

Target Investor Group - Description

A class is offered to all investors. The second letter «A» indicates that the class distributes profits. A flat rate administrative fee is charged.

Flat Fee (FF)

The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

Total Expense Ratio (TER)

The TER refers to the commissions regularly charged to the fund assets (operating expenses) and is expressed as a percentage of the fund's assets. The figure quoted relates to the level of the TER in the past financial year and does not guarantee that the level will be similar in the future.

Swinging Single Pricing (SSP)

Upward or downward correction in the net asset value pertinent for the calculation of the issue and redemption prices depending on whether issues or redemptions of units predominate. The correction (swing factor) is based on the size of the costs incurred by the investment fund in adjusting the portfolio in line with the asset inflows/outflows (neutralises the costs incurred by the investment fund in adjusting the portfolio in line with asset inflows/outflows). The (gross/net) performance shown may contain a swing-price adjustment.

Benchmark comparison

This is just a benchmark comparison. The fund's performance does not depend on the benchmark, particularly in terms of the portfolio composition.

Explanation of general risks

Investment involves risks, especially with regard to fluctuations in value and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

Risk Indicator

The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

Breakdown Allocations

Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

Volatility

Volatility is a statistical measure of risk which indicates the extent to which the absolute return on an investment or a portfolio fluctuates on average around its mean value in the course of a year.

Beta

Indicates the relative fluctuation range of a stock compared to the market as a whole. It measures the sensitivity of the stock in terms of fluctuations in its price compared to the market as a whole. If the value is between 0 and 1, the price change is below that of the market. If the beta is greater than 1, the price change of the stock is higher than that of the market on average. If it is less than 0, this describes a movement in the price of the stock counter to market trends. At 0, there is no apparent relationship.

Sharpe Ratio

The Sharpe ratio is a performance measure which indicates the risk-adjusted excess return (difference between the portfolio return and the risk-free return) compared to the investment risk incurred (volatility).

Jensen's Alpha

Jensen's alpha measures the additional return achieved versus a comparable passive investment (i.e. an investment with the same market risk or beta). Jensen's alpha is used to assess the performance of a portfolio manager. It differs from the relative – or excess – return, which is not risk-adjusted.

Information Ratio

The information ratio shows the relationship between under/overperformance and tracking error. It indicates how much more or less return was achieved per unit of active risk incurred or the extent to which the active risk paid off in the form of a higher return.

Effective Cash

Under cash, we report the total effective liquidity of all bank accounts as a percentage. Cash in foreign currencies is converted into the fund currency and added.

Direct Investment

Under Under number of direct investments (directly held investments), we report the total of all individual investments without the individual positions of the Swisscanto target funds.

SFDR

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosure requirements in the financial services sector (SFDR).

ISO Certification

Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).

Disclaimer

This document is for information and promotional purposes only, is intended for distribution in Luxembourg, and is not addressed to persons in other countries or to any person who by domicile or nationality is prohibited to receive such information according to applicable law.

Every investment involves risks, especially in terms of fluctuations in value and return. Past performance and returns are no guarantee of future investment success. The performance data have been calculated without taking account of the costs and commissions charged at the time of the issue and redemption of units. The total expense ratio (TER) refers to the commissions regularly charged to the fund assets (operating expenses) and is expressed as a percentage of the fund's assets. The figure quoted relates to the level of the TER in the past financial year or half-year and does not guarantee that the level will be similar in the future.

Swisscanto has taken all reasonable care in the preparation of this document. However, Swisscanto does not provide any guarantee with regard to the correctness or completeness of the information the document contains and waives any liability for losses arising from its use. This document is neither an offer to enter into an agreement nor an invitation to submit an offer for services. It does not constitute an offer or a recommendation for the subscription or redemption or for the acquisition, holding or sale of financial instruments. The recipient, if need be with the assistance of a consultant, is recommended to assess the information in consideration of their personal situation with regard to legal, regulatory, tax and other consequences that might be invoked. This document is neither a prospectus nor key information document.

The products and services described in this document are not available to US persons in accordance with the applicable regulations.

The fund is an undertaking for collective investment in transferable securities (UCITS) within the meaning of the EU Directive 2009/65/EC, which is subject to oversight from the Luxembourg Supervisory Authority (CSSF).

The current fund documents (sales prospectus, contractual terms, key information document and annual/half-yearly reports) can be obtained free of charge from swisscanto.com or in paper form from Swisscanto Asset Management International SA, 6, Route de Trèves, L-2633 Senningerberg.
