

Swisscanto (LU) Equity Fund Sustainable Water AT CHF

Equity | reinvesting | January 2025 - Marketing Material

Fund Description

The fund uses a proprietary sustainable purpose/quality approach to invest worldwide in equities of companies that can be expected to achieve above-average corporate growth (sustainable purpose) thanks to the positive contributions their products/services make towards decoupling the demand for water from population, economic and prosperity growth and that have above-average returns on investment (quality).

Product line and sustainability approaches in use

When selecting investments, the product lines and sustainability approaches illustrated below and described in the "Explanations regarding product lines and sustainability approaches" are used.

Note:
 - Light-coloured product lines and approaches are not applicable to the assets in question.
 - Exclusions based on SVVK-ASIR are applied in all three product lines (Traditional (non-sustainable), Responsible and Sustainable).

Swisscanto Sustainability Rating

Awards

Profile/Suitability

This product is suitable for investors who

- have at least a medium-term investment horizon.
- focus on companies that make a contribution towards achieving the water-related UN Sustainable Development Goals (SDGs) and would like to participate in the development of the international equity market.
- are interested in sustainably high capital growth.
- are willing to accept large price fluctuations in the short term compared to the broad global equity market due to the thematic focus.

Performance

Indexed Performance and Performance in %¹

For legal reasons, the performance may only be shown after a period of at least one year.

Performance in %²

For legal reasons, the performance may only be shown after a period of at least one year.

Period Specific Performance in %^{1,2}

For legal reasons, the performance may only be shown after a period of at least one year.

Historical Risk Figures

No risk figures shall be made available if the product was launched less than 1 year ago.

Portfolio Data

	Fund	BM
Number of Positions	45	1'395
Number of direct investments	45	n.a.
Effective Cash	0.44%	n.a.

¹ Year/period: Since start performance calculation or at the longest for the last 5 or 10 years/periods.

² Minor deviations can be caused by rounding errors.

The performance stated refers to the past and is not a reliable indicator of future results. The calculation is made in the reference currency of the share class. Performance in other currencies may rise or fall as a result of currency exchange rate fluctuations. The performance data assume that any dividends will be reinvested. The data take into account the costs incurred at fund level (such as administrative fees). The net performance including Agio (issue surcharge) represents the performance after deduction of fees, but takes into account the maximum issue surcharge incurred of 5.00%.

SDG 15: Life on land	10.16

Explanations regarding product lines and sustainability approaches

Product lines

The sustainability product range comprises two product lines in which different sustainability approaches are applied. The «Responsible» product line includes as standard the application of further exclusions, systematic ESG analysis as an integral part of the investment process and a reduction in the CO₂e intensity of the investments. In addition to the aforementioned approaches, the «Sustainable» product line includes the application of even more extensive exclusions and also invests in SDG leader or ESG leader (Sustainable Purpose). The exclusions based on SVVK-ASIR are applied in all product lines (including for assets that are not sustainably managed). These mainly include manufacturers of banned weapons and may also include states in addition to companies.

Stewardship - Voting / Engagement

As a shareholder, we actively engage in continuous dialogue with the companies management. This takes place in accordance with the engagement guidelines of Zürcher Kantonalbank's asset management. Among other things, companies are required to formulate ambitious greenhouse gas reduction targets, implement them consistently and report on them transparently. Our engagement activities and guidelines are published on <https://www.zkb.ch/en/home/asset-management/sustainability/investment-stewardship.html>. Our voting guidelines are based on Swiss and international corporate governance principles and on the United Nations Principles for Responsible Investment (UN PRI). The threshold for exercising voting rights in our foreign voting markets is CHF 5 million for Swiss domiciled funds and CHF 2 million for Luxemburg domiciled funds per share position. More information on our voting behaviour can be viewed at: <https://www.swisscanto.com/voting>

Controversies - Exclusions Sustainable

The application of extensive exclusion criteria is an integral part of the asset manager's Sustainable approach. In terms of companies, exclusion criteria - in addition to the exclusions based on SVVK-ASIR - cover the extraction of uranium, natural gas* or oil*, the operation of fossil fuel power stations (>5% revenue)*, the extraction of coal (excluding metal production)*, coal reserves*, the manufacture of nuclear reactors*, the production of weapons and ammunition, military hardware, automobiles* (justified exceptions possible) and aircraft*, airlines* and cruise ship operators*, the operation of nuclear power plants*, the release of GMOs* and human medicine in the field of genetic engineering, non-sustainable fishing* and fish farming*, non-sustainable forestry*, intensive livestock farming, the production of tobacco and smoking goods, the production of alcohol (>5% revenue), the production of pornography, gambling (>5% revenue), exploitative child labour, non-certified palm oil (<50% RSPO) and UN Global Compact violations. In terms of states, extensive exclusion criteria are likewise in addition to possible exclusions based on SVVK-ASIR - states with a low degree of democracy and freedom (classified as "not free" in the Freedom in the World reports published annually by Freedom House Washington, DC) or a high degree of corruption (CPI score <35 according to the Corruption Perceptions Index (CPI) of Transparency International), which apply capital punishment, increase the share of nuclear energy (total share >50%)*, have a high military budget of >4% of gross domestic product and have not ratified the Paris Climate Agreement*, the Nuclear Non-Proliferation Treaty (NPT) and/or the Convention on Biological Diversity (CBD)*. When drawing up the exclusion list, socio-economic risk dimensions such as money laundering and corruption are also taken into account. *Excluding green and sustainability bonds

ESG - Systematic ESG integration

The systematic analysis of ESG criteria forms an integral component of the active investment process, with the aim of identifying risks and opportunities based on ESG trends at an early stage. ESG criteria supplement the pure financial analysis and lead to more informed investment decisions.

Climate - <2°C Paris Climate agreement

In accordance with the Paris Climate Agreement, the investment activity of the portfolio is aimed at reducing the CO₂e intensity of the investments by at least 4% per year. The investment strategy target is based on the CO₂e intensity of the investment universe at the end of 2019.

SDGs - Sustainable Purpose

The "Sustainable Purpose" approach focuses on returns through investments in companies and countries with social benefits (SDG leaders). SDG leaders use their investment power to create environmentally and socially responsible products and services. In doing so, they contribute to the fulfillment of one or more of the UN's Sustainable Development Goals (UN SDGs). For diversification purposes, a best-in-class approach can also be used to invest in securities that are considered to have above-average positive ESG criteria (ESG leaders).

Note:

- Light-coloured product lines and approaches are not applicable to the assets in question.
- Exclusions based on SVVK-ASIR are applied in all three product lines (Traditional (non-sustainable), Responsible and Sustainable).

Further information

Further, supplementary product-specific explanations regarding the sustainability approaches applied can be found in the relevant legal documents at products.swisscanto.com.

Sustainability approaches

The sustainability approaches apply to all assets or to a substantial part of the assets. Detailed information on this can be found in the prospectus, fund agreement or investment guidelines.

CO₂e

CO₂e equivalents (CO₂e) are a measure to standardise the climate impact of the greenhouse gases carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O) and fluorinated greenhouse gases (CFCs). All of these gases remain in the atmosphere for different lengths of time and do not contribute equally to the greenhouse effect.

ESG

ESG stands for the aspects of environment (E), social (S) and governance (G).

SVVK-ASIR

The Swiss Association for Responsible Investments (SVVK) is an association of institutional investors and was founded in 2015. The association provides services to its members so that they can focus their investment decisions on the environment, society and the economy.

Swisscanto Sustainability Rating

The proprietary Swisscanto Sustainability Rating provides information on the current sustainability level of the portfolio. It is calculated from the values of the collective assets and individual securities contained in the portfolio and is divided into seven sustainability classes from A (highest level) to G (lowest level). To calculate the rating, companies and countries are assessed on the 4 pillars of our sustainability research: controversial areas of business (controversy), sustainable corporate governance (ESG), greenhouse gas emissions (climate) and impact of products on the environment and society (Sustainable Purpose). The Swisscanto Sustainability Rating is recalculated once per quarter end.

MSCI® ESG

Although Zürcher Kantonalbank's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Further, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Comments to the Fund

Target Investor Group - Term

All investors

Target Investor Group - Description

A class is offered to all investors. The second letter «T» indicates that the class reinvests profits (accumulating). A flat rate administrative fee is charged.

Flat Fee (FF)

The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

Swinging Single Pricing (SSP)

Upward or downward correction in the net asset value pertinent for the calculation of the issue and redemption prices depending on whether issues or redemptions of units predominate. The correction (swing factor) is based on the size of the costs incurred by the investment fund in adjusting the portfolio in line with the asset inflows/outflows (neutralises the costs incurred by the investment fund in adjusting the portfolio in line with asset inflows/outflows). The (gross/net) performance shown may contain a swing-price adjustment.

Benchmark comparison

This is just a benchmark comparison. The fund's performance does not depend on the benchmark, particularly in terms of the portfolio composition.

License terms of external data providers

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Explanation of general risks

Investment involves risks, especially with regard to fluctuations in value and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

Risk Indicator

The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

SDG Sales contributions

Sales (in %) of issuers in the portfolio that contribute positively to the achievement of one or more of the 17 UN Sustainable Development Goals (SDGs), weighted by portfolio allocation. If an issuer's product or service contributes to more than one goal, sales are allocated accordingly.

Breakdown Allocations

Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

Effective Cash

Under cash, we report the total effective liquidity of all bank accounts as a percentage. Cash in foreign currencies is converted into the fund currency and added.

Direct Investment

Under number of direct investments (directly held investments), we report the total of all individual investments without the individual positions of the Swisscanto target funds.

SFDR

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosure requirements in the financial services sector (SFDR).

FNG-Label

This fund has been awarded the FNG-Label, the quality standard of sustainable investments. Collective investment schemes with an FNG-Label meet the quality standard of sustainable investments developed for German-speaking regions by the professional association Forum Nachhaltige Geldanlagen e. V. (FNG). The fund has been awarded three stars for a particularly demanding and comprehensive sustainability strategy. Besides fulfilling the minimum standard of the FNG-Label, it achieved additional points in the categories "Institutional Credibility", "Product Standards" and "Portfolio Focus" (stock selection, engagement and KPIs), thereby attaining the highest level of the quality standard. Further information on the FNG-Label can be found at www.fng-siegel.org.

ISO Certification

Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).

Disclaimer

This document is for informational and advertising purposes only. It is intended for distribution in Liechtenstein and is not directed at persons in other countries or individuals whose nationality or place of residence prohibits access to such information under applicable legislation. The fund is an undertaking for collective investment in transferable securities (UCITS) within the meaning of EU Directive 2009/65/EC and is subject to the supervision of the Luxembourg supervisory authority (CSSF). The fund is registered for distribution in Liechtenstein with the competent Liechtenstein supervisory authority (FMA).

Any investment carries risks, particularly those related to fluctuations in value and income. The risks are described in the sales prospectus and the key information document. Past performance and returns are no guarantee of future investment success. The performance data do not take into account the commissions and costs charged for the issuance and redemption of units. The Total Expense Ratio (TER) refers to the ongoing costs charged to the fund's assets (operating expenses) and is expressed as a percentage of the fund's assets. The stated TER corresponds to the level in the most recently completed financial year or half-year and does not guarantee a corresponding level in the future.

This document has been prepared with the customary care. However, no guarantee is given for the accuracy or completeness of the information contained herein, and any liability for damages resulting from the use of this document is disclaimed. It does not constitute an offer or a recommendation to subscribe, redeem, buy, hold, or sell financial instruments. Recipients are advised to verify the information—if necessary, with the help of an advisor—regarding its compatibility with their personal circumstances in terms of legal, tax, and other consequences.

The fund described in this document is not available to U.S. persons in accordance with the relevant regulations.

The current fund documents (sales prospectus, terms and conditions, key information document, and annual and semi-annual reports) are available free of charge at <https://products.swisscanto.com/>. Information on sustainability-related aspects in accordance with Regulation (EU) 2019/2088 is also available on the same website.
