

Dynamic Multi-Asset Fund

INSTITUTIONAL CLASS ACCUMULATION SHARES

Fund Description

Dynamic Multi-Asset Fund is a broad, cross-asset investment strategy that applies PIMCO's macro and relative value views across liquid markets. It invests across global asset classes including equity, credit, interest rate, FX and real asset markets. The Fund is a dynamic, holistic investment portfolio that aims to generate attractive risk-adjusted returns for investors over a market cycle.

Potential Investor Benefits

- Top-down, fundamental approach to dynamic asset allocation
- An asymmetric approach to risk seeking to smooth the path of returns
- A time-tested, seasoned investment team with average 15+ years investment experience and full access to PIMCO's global resources
- A focus on liquidity, transparency and risk management which are at the core of portfolio construction at PIMCO

Potential Fund Advantage

PIMCO's global investment insights and portfolio management talent, combined with the fund's tactical management style, may enhance return potential as asset class returns are expected to be increasingly divergent.

Risk and Reward profile

Credit and Default Risk: A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk. **Commodities Risk:** The value of commodity related investments may fluctuate substantially due to changes in supply and demand and/or due to political, economic or financial events.

Currency Risk: Changes in exchange rates may cause the value of investments to decrease or increase. **Equity**

Risk: The value of equity or equity related securities may be affected by stock market movements. Drivers of price fluctuations include general economic and political factors as well as industry or company specific factors.

Derivatives and Counterparty Risk: The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations. **Emerging Markets Risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses. **Liquidity Risk:** Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price. **Interest Rate Risk:** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices). **Mortgage Related and Other Asset Backed Securities Risks:** Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.

PERFORMANCE AND FEES

Past performance is not a guarantee or a reliable indicator of future results. The "gross of fees" performance figures, if included, are presented before management fees and custodial fees, but do reflect commissions, other expenses and reinvestment of earnings. The "net of fees" performance figures reflect the deduction of ongoing charges. All periods longer than one year are annualized. Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.
