Investment objective and strategy

The investment objective of Federated Hermes Short-Term U.S. Prime Fund is to achieve current income while maintaining stability of principal and liquidity. The fund pursues its objective by investing in a portfolio of high quality (i.e., awarded one of the two highest short-term credit ratings of each recognised statistical rating organisation that has rated the security or been determined by the Advisor to be of comparable quality to securities having such ratings) US dollar denominated short-term debt instruments which comply with the criteria for money market instruments as set out in the UCITS regulations. The maximum weighted average maturity of the securities in the fund's portfolio will not exceed 60 days. The weighted average life of the fund's portfolio will be limited to 120 days or less. The types of debt securities in which the fund may invest, but is not limited to, include transferable securities listed or traded on regulated markets such as commercial paper & notes, repurchase agreements, variable rate instruments, and bank instruments, as well as shares of other short-term money market funds. The Central Bank has authorised the fund to invest up to 100% of its assets in US Government Agency Securities and US Treasury Securities on the basis that such securities will be comprised of at least six different issues and any one issue will not account for more than 30% of the net assets of the fund. The fund is considered a Short-Term Money Market Fund in accordance with the requirements of the Central Bank Notices on money market funds. The securities in which the fund invests are restricted to securities which have a residual maturity until the legal redemption date of less than or equal to 397 days.

Investment manager's report

The predictions that the Federal Reserve easing cycle would lead to an exodus of assets from liquidity products have been proven wrong. In fact, some liquidity products appear to be gaining assets since the Fed cut rates by 50 basis points in mid-September to a range of 4.75-5%. It's another case of the disconnect between some media pundits and investors. The former want their opinions heard, and bad news gets more attention. The latter simply want the highest possible return across their portfolio, whether they invest in liquidity products to offset riskier holdings or for future deployment to other investment opportunities. Historically, in a falling-rate environment, yields of cash management products lag the direct security market. Why? Because some of their holdings have locked in higher rates, and most of those won't mature until later, at some point in the next 12 months. In contrast, some securities in the direct market-especially overnight securities and those with floating rates-trace Fed moves immediately. History is only a guide, of course, but we think this will be the case as the easing continues. Some cynics say the magnitude of the half-point reduction as a mortal blow. We think that actually helps cash-like vehicles because the decline in their yields traditionally has been proportional to the cut. Had the Fed trimmed the target range by a quarter-point, liquidity yields likely would have a spread of around 12 basis points initially. As it stands, that difference is closer to 25 basis points due to the oversized cut and gets more attractive out the inverted yield curve. No wonder the inflows. And no, the sky is not falling. At the end of the month, yields on 1-, 3-, 6- and 12-month US Treasuries were 4.83%, 4.62%, 4.42% and 4.01%, respectively.

Average annual total returns (%)

(See important legal information)

Cumulative 3-month	Year to date	1-year	3-year	5-year	10-year	Since inception
1.33	4.08	5.51	3.62	2.35	1.70	2.16

Past performance is no guarantee of future performance and the value of investments and income (yield) from them may fall as well as rise and investors may not get back the amount originally invested.

Although the fund attempts to maintain a stable net asset value of US \$1.00, there is no guarantee it will be able to do so. The fund's yield may vary.

About Federated Hermes

A financial industry pioneer since 1955, Federated Hermes, Inc. ("Federated Hermes," formerly, "Federated Investors, Inc.") is one of the largest US investment managers. Known for our stability, diligence and diverse product line, Federated Hermes takes the long view, believing that doing business the right way over time will present opportunity for future growth. We apply the same approach to managing our international undertakings, which began in 1984 with the launch of one of the first international equity funds. Since then Federated Hermes has established a host of international funds and offices, including Hermes Fund Managers Ireland Limited in Dublin to manage Irish domiciled UCITS, Federated Hermes (UK) LLP (formerly Federated Investors (UK) LLP), to manage UK-domiciled UCITS, as well as the Federated Hermes Short-Term Daily U.S. Dollar Fund, Ltd., based in the Cayman Islands. Highly experienced investment professionals direct our operations, and we continually look to increase our robust global footprint through organic growth and strategic acquisitions.

Definitions

Maturity: is the date on which the life of a transaction or financial instrument ends, after which it must either be renewed or it will cease to exist.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return was not calculated according to the BVI method.

Weighted average life: is calculated in the same manner as the Weighted Average Maturity (WAM), but is based solely on the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid or (b) would be repaid upon a demand by the fund without reference to when interest rates of securities within the fund are scheduled to be readjusted.

Weighted average maturity: is the mean average of the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid, (b) would be repaid upon a demand by the fund or (c) are scheduled to have their interest rate readjusted to reflect current market rates. Securities with adjustable rates payable upon demand are treated as maturing on the earlier of the two dates if their scheduled maturity is 397 days or less, and the later of the two dates if their scheduled maturity is more than 397 days. The mean is weighted based on the percentage of the amortized cost of the portfolio invested in each period.

Important legal information

Federated Hermes International Funds plc (the "Company") is organized pursuant to the Companies Act 2014, as amended (the "Companies Acts"), and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (the "UCITS Regulations"). The Company is incorporated in Ireland under C.R.O. No. 168193. The Company is an open-ended umbrella investment company with variable capital and segregated liability between sub-funds.

Source: Federated Hermes, Inc. Past performance may not be a reliable guide to future performance. The value of an investment can go down as well as up and return on your investment will therefore be variable. Income (yield) may fluctuate in accordance with market conditions and taxation arrangements. Changes in exchange rates may have an adverse effect on the value price or income of the product, depending on an investor's home currency.

An AAAM rating by S&P Global Ratings is obtained after S&P evaluates a number of factors, including credit quality, market price exposure and management. S&P monitors the portfolio weekly for developments that could cause changes in the ratings. Fitch's money market fund ratings are an assessment of a money market fund's capacity to preserve principal and provide liquidity through limiting credit, market and liquidity risk. Ratings are based on an evaluation of several factors, including credit quality, diversification, and maturity of assets in the portfolio, as well as management strength and operational capabilities. Ratings are subject to change and do not remove market risks.

These shares have not been registered under the US Securities Act of 1933 (the "1933 Act"), as amended, or the US Investment Company Act of 1940, as amended, and may not be directly or indirectly offered or sold in the US or for the benefit of a US Person (as determined by Regulation S under the 1933 Act). This document is produced for information purposes only and does not constitute an offer to buy or a solicitation to sell, nor shall it form the basis of or be relied upon in connection with any contract or commitment whatsoever or to be taken as investment advice. Potential investors should read the key investor information documents/key information documents and the prospectus for the fund carefully and consult their own advisors before investing in the fund.
