Benefits

Clients benefit from the return potential of corporate bonds, which is higher than that of government bonds. Active portfolio management ensures that particular attention is paid to the prevailing economic situation, sector selection and issuers' credit ratings. Risk is kept in check via meticulous company analysis and broad diversification of the portfolio.

Additional information

- The investment objective is to generate a higher return than on prime USD bonds.
- The portfolio manager is not tied to the benchmark in terms of investment selection or weight.
- The exchange rate risk between USD and CHF is largely hedged.
