## Benefits

Investors benefit from exposure to High Yield as an asset class with an up in quality and potentially less volatile risk/return profile compared to a full maturity High Yield strategy. Integrating material sustainability criteria into credit research alongside financial analysis enhances our credit research and helps us make better informed investment decisions as well as providing a more holistic risk assessment. Credit risk is managed both by an experienced team drawing on fundamental credit research, and by diversifying the portfolio.

## Additional information

- The fund provides investors exposure to the high yield sector with an up in quality and potentially less volatile risk/return profile compared to a full maturity High Yield strategy.
- This fund promotes environmental, social and corporate governance characteristics.
- This sub-fund promotes environmental and/or social characteristics but does not have a sustainable investment objective.
- The portfolio manager is not tied to the benchmark in terms of investment selection or weight.

## Risks

Depending on the credit quality, the default risk is higher for high yield bonds than investment grade corporate and government bonds. Changes in interest rates affect the value of the portfolio which requires corresponding risk tolerance and capacity. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.
