Benefits

This diversified bond portfolio can be used to participate in the opportunities in the China fixed income market, as well as exposure to Chinese Yuan.

The fund is managed across duration, yield curve, sector and security selection in accordance with market conditions. This allows the portfolio to be dynamically adjusted throughout market cycles.

Additional information

- Investments are conducted in the onshore China Interbank Bond Market (CIBM), and may include both direct securities (physical bonds) and derivatives related to fixed income securities where allowed.
- The portfolio manager is not tied to the benchmark in terms of investment selection or weight.
- The exchange rate risk between CNY and GBP is largely hedged.

Risks

The fund offers higher return potential than a developed market bond portfolio and therefore bears a higher risk. In addition, emerging markets are at an early stage of development which can typically involve a high level of price volatility and other specific risks such as lower market transparency, regulatory hurdles, corporate governance and political and social challenges. Corresponding risk tolerance and capacity are required. All investments are subject to market fluctuations. The fund can invest in less liquid assets that may be difficult to sell in the case of distressed markets. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk).

All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. Please consult your client advisor for more information on the investment risks of this product.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company.
