

# UBS FMF 2025 I EUR K-1-acc

## Fund Fact Sheet

UBS Bond Funds > UBS Fixed Maturity Funds

### Fund description

- The actively managed fund invests in bonds from sovereign, quasi sovereign and corporate issuers globally (emerging and developed markets). At launch, the average credit quality of the bonds in the portfolio is investment grade, i.e. BBB (Standard & Poor's), and Baa2 (Moody's) respectively. This can change during the life of the fund.
- The fund is denominated in EUR and all other currency exposure will be hedged.

## Benefits

Investors can make an investment akin to a single bond with a fixed maturity, but with all the benefits of diversification and professional management.

Investors can lock in yields and credit spreads at current levels due to a 'buy and hold to maturity' approach.

Investors have access to a bond investment with limited duration risk, provided they stay invested until maturity, which may be of particular interest for those concerned about rising interest rates.

Investors can gain broad exposure to emerging markets sovereign and corporate bonds as well as developed market corporate exposure in a cost- and time-efficient way.

## Additional information

- The fund matures as of 30.10.2025. Cash flows will be reinvested in issues not purchased at fund inception, or used to increase any existing portfolio positions, depending on the market environment, or held in cash / cash equivalents to meet fund liquidity requirements.
- The portfolio management team generally follows a 'buy and hold to maturity' approach, while continuously monitoring all the bonds in the portfolio with scrutiny over the full life of the fund and taking appropriate action as and when required.
- This fund is not managed in reference to any benchmark.

## Risks

The fund invests in bonds and may therefore be subject to volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price. Changes in interest rates have an effect on the value of the portfolio. The fund may use derivatives, which can reduce or increase investment risk (including the risk of loss due to the bankruptcy of the counterparty). The fund can invest in less liquid assets that may be difficult to sell in distressed markets. Emerging market bonds are usually subject to a high credit risk (i.e. potential loss due to failure of issuer). Investment in fixed income securities are usually considered as carrying credit risk (i.e. potential loss due to failure of issuer). The value of a unit at expiration depends on the repayment of invested assets and reinvestments. Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at [www.ubs.com/am-glossary](http://www.ubs.com/am-glossary).

**For marketing and information purposes by UBS.** For professional clients / qualified investors only. UBS funds under Luxembourg law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Before investing in a product please read the latest prospectus and key information document or similar legal documentation carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the product as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the product level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future.
