Benefits

The sub-fund offers greater return potential with higher yields compared to global developed market high yield bonds, combined with less interest rate risk due to shorter duration. The sub-fund is managed across sector and security selection in accordance with market conditions. Investors can particularly benefit from UBS's experts "on the ground" in China with insights to markets where transparency and access to information may be limited.

Additional information

- The debt instruments in which the sub-fund invests are denominated in USD, RMB (traded in and outside mainland China) and also in other currencies.
- The sub-fund is actively managed, without reference to a benchmark.

Risks

The fund invests in bonds and may therefore be subject to volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price. Changes in interest rates have an effect on the value of the portfolio. The value of a unit may be influenced by currency fluctuations. The fund may use derivatives, which can reduce or increase investment risk (including the risk of loss due to the bankruptcy of the counterparty). The fund can invest in less liquid assets that may be difficult to sell in distressed markets. Sub-investment grade bonds are usually subject to a high credit risk (i.e. potential loss due to failure of issuer). Emerging market bonds are usually subject to a high credit risk (i.e. potential loss due to failure of issuer). Conversion Risk can arise from the use of contingent convertibles. Contingent convertibles are subject to equity conversion or principal writedown, if bank regulatory capital falls below predefined thresholds. Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.
