

UBS Systematic Allocation Portfolio Medium Fund (USD) K-1-4%-mdist Fund Fact Sheet

UBS Asset Allocation Funds > UBS Systematic Allocation Portfolio Funds

Fund description

- The actively managed fund invests globally and flexibly in a diversified range of equities, mainly high-quality bonds as well as alternative investments, including hedge funds.
- The equity exposure varies decisively depending on the market situation and will normally be within a range of 10% and 55%. In deteriorating investment environments, the model reduces risk in the portfolio by lowering equity exposure. In improving investment environments the model increases equity exposure.

Benefits

UBS Systematic Allocation Portfolio funds invest flexibly across asset classes on a global basis.

The sub-fund participates in equity markets via a flexible equity allocation with the aim to reduce drawdowns during significant bear markets accompanying economic downturns. Potential to provide appealing risk-adjusted returns over a full market cycle, by capturing significant and longer-lasting bull and bear markets in equities.

Systematic asset allocation process ensures investment discipline and aims to avoid emotional biases which is particularly important for a strategy with such wide allocation ranges.

Investment decisions are based on an investment philosophy and fundamental research.

Risks

The fund invests in fixed income and equity instruments on a global basis, as well as in alternative investments such as hedge funds. The fund purses a very active management style and may be subject to high fluctuations in value. The quantitative model is expected to be less effective during periods without notable upswings or downturns. The fund may use derivatives which can reduce investment risk or give rise to additional risks (inter alia the counterparty risk). The fund can invest in less liquid assets that may be difficult to sell in the case of distressed markets. The value of a unit may fall below the purchase price. Investors should therefore have an appropriate risk tolerance and capacity. Every fund reveals specific risks, a description of these risks can be found in the prospectus. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

The monthly 4%-mdist distributing share classes may distribute capital as well as income. It is possible that the distributions result in an erosion of assets and a reduction of invested capital. There are potential negative tax consequences for some investors in some jurisdictions. Investors in some jurisdictions may incur a higher rate of tax on distributed capital than on any capital gains which are realised on disposal of fund shares. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared to distributing (-dist) share classes. Investors should seek their own tax advice.

UBS Systematic Allocation Portfolio Medium Fund (USD) K-1-4%-mdist

Additional information

- The fund relies on the proprietary and quantitative UBS GWM CIO World Equity Market model to determine the equity allocation and thereby aims to avoid human decision error or bias.
- The high-grade bond and liquidity allocation is duration managed and adjusted to a short, neutral or long duration position to reflect the prevailing interest rate environment.
- The fund invests without any benchmark restrictions. The performance of the fund is not benchmarked against an index.
- Owing to the varying mixed asset allocation, this fund could be treated in specific phases as a bond fund for tax purposes in the UK. Investors should therefore contact a tax advisor.
- This share class distributes a constant percentage share of the NAV, not a constant amount.
- This share class is designed for investors who want to profit from performance opportunities on the financial markets and at the same time wish more stable distributions at a specific percentage level to cover recurring liquidity needs.
- As the distributions are substantial, this share class is not designed for investors who want to build wealth. The latter may prefer the accumulating share class.
- This share class must not be seen as an alternative to a savings account or fixed-interest paying investments.
- The percentage distribution rate of this share class is unrelated to the interest or other income generated in the fund. The distribution is a percentage payment of the current amount of investment.
- It is possible that the distributions result in an erosion of assets and a reduction of invested capital.
- This share class may distribute capital as well as income. There are potential negative tax consequences for some investors in some jurisdictions. See risk section below.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

For marketing and information purposes by UBS. For professional clients / qualified investors only. UBS funds under Luxembourg law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Before investing in a product please read the latest prospectus and key information document carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future.
