Benefits

The fund offers the investor straightforward and convenient access to UBS House View, which draws on the professional insights of UBS investment specialists worldwide.

The inclusion of optimized alternative investments, including hedge funds optimises the portfolio's risk/return profile.

Investors benefit globally from diversified market opportunities in a wide variety of asset classes.

The weighting of the different asset classes is maintained within a specific range in order to take account of the fund's risk profile.

The fund is attractive for investors who see risks as opportunities too. The fund aims to generate interest and dividend income as well as capital gains.

Additional information

- The fund is based on UBS's investment policy, the UBS House View.
- The fund invests without any benchmark restrictions. The performance of the fund is not benchmarked against an index.

Risks

The fund invests in equities, bonds of varying credit quality, money market securities on a global basis, as well as in alternative forms of investment such as hedge funds. It may therefore be subject to fluctuations in value. The fund may use derivatives which can reduce investment risk or give rise to additional risks (inter alia the counterparty risk). The fund can invest in less liquid assets that may be difficult to sell in the case of distressed markets. It therefore cannot be ruled out that the daily issue and redemption of fund units may be suspended temporarily. The value of a unit may fall below the purchase price. This requires an elevated risk tolerance and capacity. Every fund reveals specific risks, a description of these risks can be found in the prospectus. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.
