Benefits

Clients benefit from a portfolio that is broadly diversified across various sectors and ratings and from meticulous issuer selection. The latter is based on the in-depth credit research carried out by our expert team of professional corporate bond analysts.

Clients can benefit from the return potential of corporate bonds. They offer greater potential than government bonds as the credit risk associated with corporate bonds is generally compensated with a higher return.

The fund has a lower interest-rate risk than long-term bond investments.

Additional information

- Interest-rate risk is limited to the medium-dated segment.
- The portfolio manager is not tied to the benchmark in terms of investment selection or weight.
- This sub-fund promotes environmental and/or social characteristics but does not have a sustainable investment objective.

Risks

Changes in interest rates have an effect on the value of the portfolio. Medium-term investments are subject to fluctuations in value that are greater than money market instruments but less than long-term bonds. This requires corresponding risk tolerance and capacity. All investments are subject to market fluctuations. The fund can invest in less liquid assets that may be difficult to sell in the case of distressed markets. Every Fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the product level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations.
