

PF - High Dividend Fund I

Retirements funds

Data as of 31.07.2024

Fund description

The fund invests in equities offering attractive dividend payout.

The focus is on Swiss quality companies, the fund units of which account for 70%. The remaining 30% of fund assets is invested in companies around the world with high dividend yields.

The fund is suitable for investors with a long-term investment horizon who primarily seek capital growth and dividend income.

The fund is suitable for investors who are prepared to accept major price fluctuations and are familiar with the risks involved in equity investments.

The fund is not suitable for investors who intend to withdraw their investment within nine years.

Roche	6.91%
Nestle	6.38%
UBS	5.81%
Zurich Insurance	5.62%

Country breakdown in % as of 30.06.2024

Benefits

The PF – High Dividend Fund is a global equity fund that combines different regions, countries, sectors and currencies in a single solution. In addition to a broad diversification of investments, the fund benefits from investments in companies that are likely to be able to pay sustainable dividends.

Risks

The PF - High Dividend Fund invests in shares, and may therefore be subject to significant fluctuations in value. This requires a high risk appetite and capacity. The value of a unit may fall below the purchase price. The fund can invest indirectly in assets with low liquidity, the saleability of which may be limited in difficult market conditions. The fund can use derivatives that can help reduce investment risks, or lead to additional risks (e.g. the risk of the counterparty going bankrupt). The fund is subject to risks due to operational or human errors that may occur at the capital management company or depository, or with other third parties. Every fund has its own specific risks. You can find more details on the fund and the risks involved in the Key Information Document (PRIIP KID), the leaflet and the brochure "Risks Involved in Trading Financial Instruments".

Glossary

Distribution

The aim of an investment fund is to generate income for investors from coupons, dividends and capital gains by using a defined strategy. The distribution type and sum varies depending on the fund type. Distribution: Income generated by the fund is distributed amongst the shareholders once a year. On the distribution date, money is released from the fund and transferred to the investor. The unit price therefore decreases by approximately the distribution amount at this time.

Fund domicile

The fund is domiciled in the country in which it was set up, or in which it was notified to the local supervisory authority for registration. The fund domicile governs which law the fund is regulated by. This is particularly relevant from a fiscal perspective (e.g. in relation to withholding tax). All PostFinance funds are domiciled in Switzerland.

ISIN

The ISIN number is the international indicator for securities. It is used to clearly identify securities. In Switzerland, the security number is also often used for identification purposes.

Morningstar Rating™

The Morningstar Rating™ is an assessment of a fund's past performance – based on both return and risk – which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. © 2016 Morningstar. All Rights reserved.

MSCI ESG fund rating

The MSCI ESG Fund Rating is an independent fund rating. It measures the resilience of investment funds in response to long-term risks and opportunities, taking into account environmental, social and governance aspects (ESG).

The MSCI ESG Rating uses rating categories (e.g. AAA = 8.6 to 10). ESG Ratings range from Leader (AAA, AA), Average (A, BBB, BB) to Laggard (B, CCC).

Net asset value (NAV)

The net asset value of a fund is the sum of all valued securities less any liabilities. The NAV of a unit corresponds to the fund's net assets divided by the number of units in circulation. The fund price is generally computed every day.

Performance

Performance describes the total return on an investment as a percentage over a certain observation period. Performance is usually shown in the accounting currency of the fund. It consists of price variations and reinvested returns. In the case of distributing funds, this calculation of performance is based on the assumption that the distributed money will be reinvested (without any withholding tax deductions).

Risk and reward profile

The risk and reward profile is an assessment of the fund based on the fluctuations in performance over the past five years. Funds with a lower risk tend to be associated with lower returns. Funds with a higher risk tend to be associated with higher returns. The method used to make this assessment depends on the fund type. Past performance cannot be used to draw conclusions about future development. The risk category is not guaranteed, and may change over time.

Risk-free rate

The risk-free rate (of return) refers to the return/interest income that a risk-free investment would generate over a certain period of time.

Security number

The security number is the Swiss security number for securities, providing for their unique identification. It corresponds to the ISIN number at the international level.

Sharpe ratio

The Sharpe ratio is a key figure used to analyse the performance of a fund. To calculate this figure, the excess return (fund return minus risk-free interest) of the fund is compared with its volatility. If the Sharpe ratio is positive, this means the greater risk paid off. If this key figure is negative, the added risk has not paid off.

Swinging single pricing (SSP)

This refers to an originator-oriented calculation method for figuring the net asset value of a fund. The costs incurred in purchase and sales transactions (e.g. commissions, brokerage fees, charges and duties) are taken into account and charged to those causing them to be incurred. Where more subscription transactions than redemption transactions are effected on the subscription or redemption day, the fund's NAV is increased by the so-called swing factor. As such, the purchaser assumes the costs for the investment of his or her funds already at this point in time. If, however, the number of redemption orders is higher than the subscription orders, the NAV is reduced by the swing factor.

Total expense ratio (TER)

The total expense ratio is a measure of the total cost of a fund to the investor in terms of the ratio of annual costs to the fund's net assets. In this context "costs" pertains to all expenses according to the income statement, including management, administration, custody account, audit, legal and adviser fees. Transaction costs are not taken into account in funds.

Volatility

Volatility is a risk indicator that looks at the fluctuations of the fund return within a given time frame. The higher the volatility, the greater the price variations and potential return or loss. The portfolio theory assumes that a higher return can only be achieved by taking on a greater risk.

ESG Report

PF - High Dividend Fund I

ESG report database as at 30.06.2024

ESG stands for environment, social and responsible corporate governance. ESG ratings are used to assess the sustainability of companies that the fund invests in, and to express it in key figures. To do so, the three areas for sustainable economic activity are examined. ESG ratings are therefore intended to determine how a company exercises this responsibility.

Transparent disclosure of ESG values

This fund is based mainly on traditional benchmark indices and does not explicitly take into account ESG criteria. As a result, it is not a sustainable fund. However, it is important to PostFinance to also create transparency for this fund in the form of this report with regard to ESG ratings, global warming potential, Sustainable Development Goals (SDG), compliance with the United Nations Global Compact (UNGC) initiative and any controversial business activities.

MSCI ESG Rating

The MSCI ESG Fund Rating measures environmental, social and corporate governance characteristics for the companies in which the fund has invested and ranks all holdings of the fund on a scale from AAA to CCC. AAA is the most sustainable level.

The graphic below shows the greenhouse gas emissions of the fund in tonnes per millions of CHF in investment compared to the traditional benchmark index that is not explicitly sustainable*.

(Data coverage: 98% of the portfolio)

The five best ESG positions

	Proportion	ESG Rating
ABB Ltd	5.23%	10.0
Swiss Re AG	3.80%	10.0
Cembra Money Bank AG	1.28%	10.0
SIG Group AG	0.98%	10.0
Galenica AG	0.85%	10.0

ESG rating of the five biggest positions

	Proportion	ESG Rating
Novartis AG	7.09%	7.5
Roche Holding AG	6.35%	5.8
Nestle S.A.	6.04%	6.3
UBS Group AG	5.57%	8.5
Zurich Insurance Group A	5.57%	9.3

Carbon footprint

The carbon footprint is calculated based on the greenhouse gas emissions (in CO₂ equivalents) caused by the invested companies within the fund.

* The reference index is a mixed index, which tracks the same asset classes as the fund itself – with traditional, non-explicitly sustainable indices. Further information on the reference index can be found in the "Prospectus with integrated fund contract".

Global warming potential

The global warming key figure is receiving more and more attention. We therefore aim to show the portfolio's temperature value in this report in the near future.

UNGC compliance

The United Nations Global Compact (UNGC) initiative defines ten principles comprising minimum social and environmental standards (including human rights, freedom of association, elimination of forced and child labour, environmental protection and anti-corruption measures) that companies commit to upholding. Note: The fund cannot have a higher percentage value than the maximum for the companies evaluated in the MSCI ESG Rating (page 1).

UNGC compliance rate	89%	82%
	Fund	Reference index

Controversial business activities

This key figure shows what percentage of the companies in the fund or reference index are involved in controversial business activities. In line with industry standards, only companies that exceed a certain threshold value are reported on. We use the threshold values from the MSCI ESG Leaders Indexes Methodology as guidance, with the exception of Thermal Coal (0% instead of 5%). The additional threshold values are defined as follows: Alcohol 10%, Nuclear Power 10%, Gambling 10%, Conventional Weapons 10%, Nuclear Weapons 0%, Tobacco 5% for production and 15% for distribution. Controversial Weapons 0%. Civilian Firearms: 5% for production and 15% for distribution.

	Fund	Reference index
Alcohol	0%	0%
Civilian Firearms	0%	0%
Controversial Weapons	0%	0%
Conventional Weapons	0%	0%
Gambling	0%	0%
Nuclear Power	1%	1%
Nuclear Weapons	0%	0%
Thermal Coal	0%	0%
Tobacco	0%	0%

Alignment with the SDGs

The UN's 17 global Sustainable Development Goals (SDGs) and their 169 targets address the economic, social and environmental dimensions of sustainable development in a balanced way. These are the core of the UN's Sustainable Development Agenda and are to be achieved globally and by all UN member states by 2030. The rating below reflects the net contribution of the fund to the achievement of the 17 UN goals on a scale of -10 (negative contribution) to +10 (positive contribution). The evaluation of the individual securities in a fund is based on both the products and services and the operating activities of the companies included in the fund. These values are only used for comparison purposes, and the fund does not pursue its own target.

Legal information

This information and these statements are for information purposes only and do not constitute either an invitation to tender, a solicitation, an offer or a recommendation to purchase a service, buy or sell any securities or other financial instruments or to perform other transactions. This information does not take into consideration the specific or future investment goals, financial or tax situation or particular needs of any specific recipient, and is therefore not a suitable basis for investment decisions. We recommend that you consult your financial or tax advisor before every investment. The price, value and return of investments may fluctuate. Investment in financial instruments is subject to certain risks and does not guarantee the retention of the capital invested or an increase in value. All investment services and financial instruments provided by PostFinance Ltd are unavailable to US persons and other persons whose domicile or tax liability is outside of Switzerland and will therefore neither be offered nor sold/provided to them. PostFinance Fonds are issued in accordance with Swiss law. Prospectuses, KIID, BIB, the management regulations as well as annual and interim reports are available free of charge from the PostFinance Operations Center, any PostFinance branch or from UBS Fund Management (Switzerland) AG, P.O. Box, 4002 Basel, Switzerland. Before investing in a product, please read the latest prospectus carefully and thoroughly. Past performance is not a reliable indicator of future results. The performance shown does not take account of any commissions and costs charged when purchasing units. Commissions and costs have a negative impact on performance. All ESG values and targets in this report are measured and reported using data from MSCI ESG Research. The traditional benchmark index used in this report is calculated using an approximation method, which may result in a different representation of the ESG target attainment for this fund.
