

UBS (CH) Institutional Fund 2 – Equities Global Climate Aware II I-X

Portrait

- Regulation / Supervision: CISA / FINMA (funds for qualified investors).
- Authorized investors: occupational pension funds which are entered in the register of occupational pension schemes and can obtain full exemption from Japanese withholding taxes on dividends under the double taxation agreement between Switzerland and Japan.
- Investment: The fund generally invests in stocks contained in the MSCI World ex Switzerland Index. The relative weightings of the companies is tilted toward their expected contribution to climate change. Companies geared toward long-term change leading to a low emissions global economy will be overweighted in the portfolio.
- Convertible and warrant bonds: none.
- The fund aims to overweight companies that are aligned with a transition to a lower carbon economy and underweight companies that are not.
- The carbon profile of the portfolio is aligned with a net zero (1.5 degree) glide path targeting net zero by 2050.
- The expected ex-post tracking error is approximately 0.5%. The maximum ex-ante tracking error target value is less than 1%. *
- Currency exposure: in line with securities portfolio.
- Securities lending: not permitted.
- Use of derivatives: permitted under BVV2.
- Japan and US dividends: exempted from withholding tax in each case.
- No investments in securities on the recommendation list for exclusion of SVVK-ASIR (www.swk-asir.ch) and the UBS Asset Management Sustainability Exclusion Policy.
- All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. Please consult your client advisor for more information on the investment risks of this product.

* There may be circumstances where it is not possible to meet all financial, risk and sustainability objectives simultaneously. In case satisfying all objectives would not be possible, climate objectives would take precedence.

UBS (CH) Institutional Fund 2 – Equities Global Climate Aware II I-X

For marketing and information purposes by UBS. For professional clients / qualified investors only. UBS funds under Swiss law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Before investing in a product please read the latest prospectus and key information document carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The details and opinions contained in this document are provided by UBS without any guarantee or warranty and are for the recipient's personal use and information purposes only. This document may not be reproduced, redistributed or republished for any purpose without the written permission of UBS Asset Management Switzerland AG or a local affiliated company. Glossary

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors are available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

UBS AM sustainability approaches applied

Exclusion: Strategies that exclude securities from portfolios where they are not aligned to an investor's values. Includes customized screening criteria.

ESG Integration: Strategies that integrate environmental, social and governance (ESG) factors into fundamental financial analysis to improve risk/return profile.

SI Focus: Strategies where sustainability is an explicit part of the investment guidelines, universe, selection and/or investment process

Impact: Strategies where the intention is to generate measurable environmental and/or social benefits ("impact") along-side the financial return.

Voting: Exercising shareholder rights by proxy voting on resolutions.

Engagement: (Pro-) actively entering in a dialogue with companies to influence material ESG topics.

Controversy check: Controversial Business Involvement exposure is the exposure to companies with a revenue share exceeding a certain threshold of the respective field (production).

UBS (CH) Institutional Fund 2 - Equities Global Climate Aware II – ESG Report

Weighted Average Carbon Intensity (tons CO₂e/USDm sales): The Weighted Average Carbon Intensity (WACI) measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. This metrics is applicable across asset classes, including fixed income, as it's not based on equity ownership basis. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Data provider: MSCI ESG Research

MSCI ESG Fund Ratings** are designed to measure the Environmental, Social and Governance (ESG) characteristics of a fund's underlying holdings, making it possible to rank or screen mutual funds and ETFs on a AAA to CCC ratings scale. MSCI leverage MSCI ESG Ratings for over 10,500 companies (19,500 total issuers including subsidiaries) and more than 760,000 equity and fixed-income securities globally to create ESG scores and metrics for approximately 56,000 multi-asset class Mutual funds and ETFs globally (as of January 17, 2022).

** MSCI ESG Research LLC's ("MSCI ESG") fund metrics and ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 56,000 multi-asset class Mutual funds and ETFs globally (as of January 17, 2022). MSCI ESG is a Registered Investment Adviser under the Investment Advisers Act of 1940. MSCI ESG materials have not been submitted to, nor received approval from, the US SEC or any other regulatory body. None of the Information constitutes an offer to buy or sell, or a promotion or recommendation of any security, financial instrument or product or trading strategy, nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. None of the Information can be used to determine which securities to buy or sell or when to buy or sell them. The Information is provided "as is" and the user of the Information assumes the entire risk of any use it may make or permit to be made of the Information.

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. ESG scores are also shown a breakdown of the E, S and G scores, in reference to the different components that are considered for the Environmental, Social and Governance pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies. In addition, sectoral differences are taken into account through key industry specific ESG issues. This makes the ESG score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time.

Important information about sustainable investing strategies

Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment instruments available to such portfolios may differ. Companies, product issuers and/or manufacturers may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues.

Reconciliation of Assets under Management (AuM)

This report does not contain reconciled AuM positions, it only takes in consideration positions with settlement date as of report date. This means that traded but not settled positions are not included. Therefore, AuM figures in this report may differ from other UBS reports produced on the same date.

Although UBS Asset Management information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness of any data herein. None of the ESG Parties makes any express or implied warranties of any kind, and the ESG Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to any data herein.
