## FUND OBJECTIVE

Bronze

To increase the value of your shares by investing the majority of its assets in US companies.

Investment selection is the result of fundamental research and analysis in an effort to identify companies that are believed to have the potential to increase in value.

This potential may be realised in many ways, some of which include:

- Free cash flow generation
- Product or process enhancements
- Margin increases
- Improved capital structure management

## **RISK CONSIDERATIONS**

Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

Liquidity Risk: The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

**Operational Risk:** The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

**Derivatives Risk:** The fund is permitted to use certain types of financial derivative instruments (including certain complex instruments). This may increase the fund's leverage significantly which may cause large variations in the value of your share. Investors should note that the fund may achieve its investment objective by investing principally in Financial Derivative Instruments (FDI). There are certain investment risks that apply in relation to the use of FDI. The fund's use of FDI can involve significant risks of loss.

**Concentration Risk:** The fund's investments may be concentrated in a small number of investments and its performance may therefore be more variable than the performance of a more diversified fund.

Currency Risk: Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.

For full information on these and other risks, please refer to the fund prospectus and offering documents, including the KID or KIID, as applicable.

The fund is actively managed, which means that the investments are selected at the discretion of the investment manager. The fund is not constrained by its benchmark, which is used for comparison purposes only. The fund gives some consideration to the benchmark constituents in the selection of securities and may not hold all or many of the benchmark's components.

Performance to latest month end. YTD - Year to Date, SI - Since Inception, m - month, y - year. 12 month period based on month end NAVs.

7Returns for these periods are cumulative.

<sup>8</sup>Returns are annualised for periods longer than one year.

<sup>9</sup>Data shown since inception of the USD T Accumulating Class.

<sup>10</sup>Performance for the current calendar year is the year to date.

<sup>11</sup>Data shown since the share class inception date.

Where a benchmark is shown, the benchmark shown is provided in the base currency of the fund and therefore may not be a fair representative comparison to the hedged currency share class shown. The difference in the currency exposure and currency fluctuations in an unhedged benchmark may cause an unintended differential in any performance or risk comparison.
