- The NASDAQ AlphaDEX® Emerging Markets Index is an "enhanced" index created and administered by Nasdaq, Inc. ("Nasdaq") which employs the AlphaDEX® stock selection methodology to select stocks from the NASDAQ Emerging Markets Index that meet certain criteria.
- To construct the Index, Nasdaq ranks the eligible stocks on growth factors including 3-, 6- and 12- month price appreciation, sales to price and one year sales growth, and separately on value factors including book value to price, cash flow to price and return on assets. All stocks are ranked on the sum of ranks for the growth factors and, separately, all stocks are ranked on the sum of ranks for the value factors. A stock must have data for all growth and/or value factors to receive a rank for that style.
- Each stock receives the best style rank from the previous step as its selection score.
- The top 150 stocks based on the selection score determined in the previous step comprise the "selected stocks".
- The selected stocks are divided into quintiles based on their rankings and the top ranked quintiles receive a higher weight within the index. The stocks are equally weighted within each quintile.
- Each stock is then tested in order of its selection score rank to check if the weight assigned to that stock is outside the country/sector weighting constraints, which are set at 15% above the benchmark weight.
- If the weight assigned to the stock, when added with the weight assigned to all higher ranking stocks in its country/sector, is greater than the constraint, then the stock's weight is lowered to the highest rank in the next quintile. Stocks previously lower in rank then move up one rank. Such stocks in the lowest quintile that violate a constraint are removed from the portfolio and replaced by the highest scoring stock not originally selected, subject to country/sector constraints. This process continues until all the country/sector weightings meet the constraint.
- The Index is reconstituted and rebalanced semi-annually.

Risks

- **The Fund may not achieve its investment objective and the value of shares in the Fund may fall.**
- Neither First Trust Global Portfolios Management Limited ("FTGPM") nor any of its affiliates, guarantees the performance or the future returns of the Fund.
- The Fund may be subject to Chinese investment risks, including risk related to variable interest entities ("VIEs"). In China, direct ownership of companies in certain sectors by foreign individuals and entities is prohibited, and VIE structures are put in place to allow indirect foreign investment, including an investment by the Fund. Although VIEs are a longstanding industry practice and well known to officials and regulators in China, VIEs are not formally recognized under Chinese law. Intervention by the Chinese government with respect to

VIEs could cause the market value of the Fund's associated holdings to suffer significant, and possibly permanent, effects which could negatively impact the Fund's Net Asset Value and could result in substantial losses. Further, it is uncertain whether any new laws, rules or regulations relating to VIE structures will be adopted or, if adopted, what impact they would have on the value of a Fund's shares.

- There is no assurance that the Index will continue to be calculated and published on the basis described in the Prospectus. In addition, the Fund's return may not match the return of the Index.
- See also the description of the risks applicable to the Fund in "Risk Factors" in the Prospectus.
