- Eligible securities must have a minimum market capitalization of \$500 million, six-month average daily trading volume of at least \$2 million (\$1 million for emerging market companies), traded for at least 90% of the total trading days in the last six months or for a security recently issued in an initial public offering over the prior three months, a minimum free float of 10% of shares outstanding and a share price of less than \$10,000 for new index constituents.
- All eligible securities are analyzed by Indxx and classified into one of two sub-themes based on their exposure to 5G and/or next generation technology, either 5G Infrastructure & Hardware or Telecommunications Service Providers:
- 5G Infrastructure & Hardware consists of Data Center REITs, Cell Tower REITs, Equipment Manufacturers, Network Testing and Validation Equipment and Software Companies and Mobile Phone Manufacturers.
- Telecommunications Service Providers consist of companies that operate the mobile cellular and wireless communication networks that offer access to 5G networks.
- Eligible securities are ranked by market capitalization and up to 100 securities with the largest market capitalizations are selected. 80% of the index weight is allocated to 5G Infrastructure & Hardware and 20% of the index weight is allocated to Telecommunications Service Providers. The companies are then equally weighted within each sub-theme.
- The Index is reconstituted and rebalanced semi-annually.
