

# First Trust Low Duration Global Government Bond UCITS ETF

The Fund's investment objective is to deliver total returns to investors over the medium to long term by investing in sovereign fixed income securities globally. The actively managed Fund primarily invests in sovereign fixed income securities, and seeks to minimize the effect of the underlying currency exposure of those securities by utilizing currency hedging transactions. The Investment Manager also adopts a proprietary rules-based strategy, utilizing Carry and Value factors to generate stable total returns from a diversified portfolio of Global Sovereign Bonds.

## Risks

- **The Fund may not achieve its investment objective and the value of shares in the Fund may fall.**
- Neither First Trust Global Portfolios Management Limited ("FTGPM") nor any of its affiliates, guarantees the performance or the future returns of the Fund.
- Bond prices and returns from investing in bond markets are sensitive to changes in interest rates which are in turn determined by a number of economic factors, in particular market expectations of future inflation. Investment in bonds also results in exposure to the risk that the bond issuer defaults on its obligations which is likely to result in a loss of value for the bondholder. Higher yielding bonds and emerging market bonds are generally perceived to carry a higher risk of default and a greater possibility of loss to the Fund.
- The Fund may invest in schemes which are substantially leveraged and any event which may adversely affect the value of the underlying scheme could significantly affect the assets of the Fund.
- See also the description of the risks applicable to the Fund in "Risk Factors" in the Prospectus.
