

# First Trust Vest U.S. Equity Moderate Buffer UCITS ETF - November

The Fund is an actively managed Fund which seeks to provide investors with returns (before fees and expenses) that match the price return of the S&P 500® Index (the "Index") up to a predetermined upside cap, while providing a buffer (before fees and expenses) against the first 15% of Index losses, approximately a one year period starting 17 November 2023. Under normal market conditions, the Fund will invest substantially all of its assets in Flexible Exchange® Options ("FLEX Options") that reference the price performance of the S&P 500® Index. FLEX Options are customised equity or index put and call option contracts that are cleared by the Options Clearing Corporation (the "OCC") and traded on Regulated Markets in the US (and in particular the Cboe Options Exchange). The ETF can be held indefinitely, resetting at the end of each outcome period (approximately annually).

## Fund Sub-Investment Manager: Vest

First to Market:

Vest was founded in 2012 and launched the first investment funds to use a Target Outcome Investments® strategy.

Pioneers of Target Outcome Investing:

Vest pioneered this space starting in 2012 with a filed patent for outcome-oriented methods in investment products. In partnership with Cboe and S&P, they developed indices that sought to deliver buffer protection on losses for the S&P 500 over a specified Target Outcome Period, with upside participation to a cap.

- The First Trust Vest U.S. Equity Moderate Buffer UCITS ETF - November is actively managed using a "Target Outcome Investments<sup>®</sup> strategy" which seeks to produce a pre-determined investment outcome during a specified time period (the "Target Outcome Period") based on the performance of the underlying reference asset.
- The outcome may only be realised for an investor who holds shares on the first day of the Target Outcome Period and continues to hold them on the last day of the Target Outcome Period.
- The Fund invests substantially all of its assets in FLEX Options that reference the performance of the S&P 500<sup>®</sup> Index. FLEX Options provide investors the ability to customize key contract terms, such as exercise prices, styles and expiration dates.
- The Fund resets annually on the first day of each new Target Outcome Period by investing in a new set of FLEX Options that provide the buffer and cap for the new Target Outcome Period. For each Target Outcome Period, the Fund will construct a portfolio of purchased and written put and call FLEX Options.
- The Fund only seeks to provide shareholders that hold shares for the entire Target Outcome Period with the full target buffer against S&P 500<sup>®</sup> Index losses (based upon the value of S&P 500<sup>®</sup> Index at the time the fund entered into the FLEX Options on the first day of the Target Outcome Period) during the Target Outcome Period.
- The Fund will not terminate after the conclusion of the Target Outcome Period. After the conclusion of the Target Outcome Period, another will begin.
- There is no guarantee that the outcomes for a Target Outcome Period will be realised.
- The buffer and cap for each subsequent outcome period will likely differ from the initial outcome period.
