

New Capital Global Convertible Bond Fund

(USD I Acc)

Fund Objective

New Capital Global Convertible Bond Fund aims to outperform the Thomson Reuters Convertible Global Focus Index. The investment team invests in a portfolio of global convertible bonds through a bottom-up investment process to select the securities that will achieve the best asymmetry of returns. A top-down review is used to adjust regional exposures and manage consolidated risks.

Performance

Past performance is not necessarily a guide to the future. The value of your investments and the income from them may fall as well as rise as a result of market as well as currency fluctuations and you may not get back the full amount invested. Fund performance is net of fees and representative of the USD I Acc Share Class and shows a maximum of five previous calendar years and current year to date (computed on a NAV to NAV basis). Where share class inception begins prior to the five previous years the chart has been rebased to 100. Where the Fund has fewer than five full years of performance, returns are shown from the inception date. Source: EFG Asset Management, Bloomberg. As at 30 April 2021.
