SUMMARY OF INVESTMENT OBJECTIVE AND POLICY

The Wellington Global Credit ESG Fund seeks long-term total returns in excess of the Custom Bloomberg Global Aggregate Corporate (Fin 40% cap) USD/EUR/GBP 1% Cap USD 500M Min Index (ex Tier 1, Upper Tier 2, and Capital Credit securities) Index. The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing primarily in a diversified portfolio of investment grade corporate debt instruments, including exchange-traded and over-the-counter derivatives.

WHAT ARE THE RISKS?

BELOW INVESTMENT GRADE: Lower rated or unrated securities may have a significantly greater risk of default than investment grade securities, can be more volatile, less liquid, and involve higher transaction costs.

CAPITAL: Investment markets are subject to economic, regulatory, market sentiment and political risks. All investors should consider the risks that may impact their capital, before investing. The value of your investment may become worth more or less than at the time of the original investment. The Fund may experience a high volatility from time to time.

CREDIT: The value of a bond may decline, or the issuer/guarantor may fail to meet payment obligations. Typically lower-rated bonds carry a greater degree of credit risk than higher-rated bonds.

CURRENCY: The value of the Fund may be affected by changes in currency exchange rates. Unhedged currency risk may subject the Fund to significant volatility.

DERIVATIVES: Derivatives may provide more market exposure than the money paid or deposited when the transaction is entered into (sometimes referred to as Leverage). Market movements can therefore result in a loss exceeding the original amount invested. Derivatives may be difficult to value. Derivatives may also be used for efficient risk and portfolio management, but there may be some mismatch in exposure when derivatives are used as hedges. The use of derivatives forms an important part of the investment strategy.

HEDGING: Any hedging strategy using derivatives may not achieve a perfect hedge.

INTEREST RATES: The value of bonds tends to decline as interest rates rise. The change in value is greater for longer term than shorter term bonds.

MANAGER: Investment performance depends on the investment management team and their investment strategies. If the strategies do not perform as expected, if opportunities to implement them do not arise, or if the team does not implement its investment strategies successfully; then a fund may underperform or experience losses.

SHORT SELLING: A short sale exposes the Fund to the risk of an increase in market price of a security sold short; this could result in a theoretically unlimited loss.

SUSTAINABILITY: A Sustainability Risk can be defined as an environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment.
