Benefits

An investment strategy that aims to produce returns driven by stock selection while achieving some downside protection in declining equity markets.

Maximising opportunities from unique and uncorrelated sources of performance.

The Fund offers daily liquidity.

Additional information

- The 'gross exposure' (total of 'longs' and 'shorts') indicates total exposure to markets and is typically 125 to 200% of capital.
- The 'net exposure' ('longs' less 'shorts') is a measure of the Fund's exposure to market change and is typically 20 to 40%.
- The exchange rate risk between EUR and JPY is largely hedged.

Risks

The Fund delivers both long and short exposure to equities, in order to reduce the volatility of the portfolio relative to a common long only fund. Despite the expected reduction in volatility, the Fund can still be subject to high fluctuations in value. As the fund uses derivatives & sophisticated leverage techniques, investors must be willing to bear the additional risk involved. Other risks include counterparty, operational and currency risk although portfolio positions are hedged back to the Fund's EUR base currency unless stated otherwise. GBP hedged share classes aim to mitigate fluctuations in the GBP/EUR exchange rate for GBP based investors.
