## Risks

The fund invests in bonds and may therefore be subject to volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price. Changes in interest rates have an effect on the value of the portfolio. Investment grade bonds are usually considered as carrying low to medium credit risk (i.e. potential loss due to failure of issuer). The fund can invest in less liquid assets that may be difficult to sell in distressed markets. Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.
