

# Monthly report BKB Investment Solution – Sustainable Balanced (CHF) B

## Fund description

The fund mainly invests the fund assets in units of other collective investment schemes that invest their assets primarily in Swiss franc-denominated investments. The sustainable investment management solution will include traditional financial figures as well as environmental and social criteria in the investment decision.

The investment objective of BKB Anlagelösung – Nachhaltig Ausgewogen is primarily the real preservation and long-term growth of capital through capital gains as well as the achievement of above-average income within the framework of the risk profile.

The investment is suitable for investors who

- would like to build on income from bonds while profiting from stock price increases,
- have a long-term investment horizon,
- are prepared to accept larger price fluctuations,
- are prepared to invest a portion of their assets in foreign currencies,
- want to invest their capital sustainably.

### Breakdown by currencies (in %)

### Breakdown by investment instruments (in %)

### Key benefits

- The weightings of the various asset classes are maintained within specific ranges in order to take account of the investor's risk profile.
- Investment decisions are made and implemented in accordance with current market circumstances and by experienced investment experts. Thanks to the best-in-class approach investments are made in the best products on the market and independently of distribution partners.

### Risks

- Investments are associated, in particular, with the risk of fluctuations in value and returns.
- The fund may use derivatives, which can reduce investment risks or give rise to additional risks (including counterparty risk).
- Each fund has specific risks. A comprehensive and detailed description of these risks can be found in the prospectus.

### Portfolio commentary

International equity markets once again moved unevenly during the reporting month of August. The Swiss equity market was able to build on the profits of the previous months. We continue to expect a below-average but positive economic development over the rest of the year. The increase in GDP in the USA of +2.8% according to estimates was even a pleasant surprise in the 2nd quarter. However, the prospects for the eurozone remain gloomy. The forecasts for 2024 indicate a further decline in inflation. In Switzerland, this most recently lay within the SNB's target range at +1.3%.

We are currently maintaining a slight overweight for the equity share within our Investment Solutions. Expectations of increasing corporate profits, further interest rate cuts by the central bank and low inflation rates continue to favour this positioning.

Our investment in the precious metal gold has also increased in value in the month of August and has developed very pleasingly over the course of the year so far.

Swiss interest rates remained almost unchanged in the reporting month. Our underweight in the asset class Bonds CHF remains in place.
