

Monthly report BKB Investment Solution – Rules Based (CHF) V

Fund description

The fund mainly invests the fund assets in units of other collective investment schemes that invest their assets primarily in Swiss franc-denominated investments.

The investment objective of the BKB Anlagelösung – Regelbasiert based lies in the earning of a regular income through interest and dividend returns as well as a long-term real asset growth through capital gains.

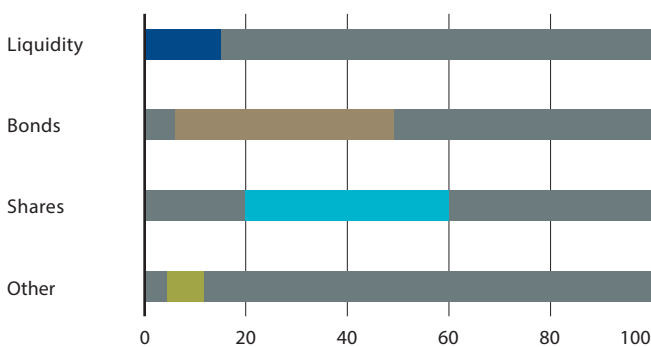

With the rule-based approach, three different strategy modules are combined: «Rebalancing», «Trend» and «Relative Strength». The allocation of the investment classes should thus be adjusted to the market environment.

The investment is suitable for investors who

- prefer an increased readiness to assume risk and a dynamic investment style,
- have a long-term investment horizon,
- are prepared to accept larger price fluctuations,
- would like to profit from the tax advantages of pension schemes,
- are prepared to invest a portion of their assets in foreign currencies.

Allowed is exclusively the investment of funds deriving from vocational pension schemes and tied personal savings in Switzerland (Pillars 2 and 3a) of Basler Kantonalbank.

The investments are within the following ranges (in %):

Key benefits

- The investment capital is allocated to various investment classes and adjusts dynamically to the market environment.
- The management form, based on algorithmic rules, creates systematic investment decisions, which are not characterized by subjective, human decisions.

Risks

- Investments are associated, in particular, with the risk of fluctuations in value and returns.
- The fund may use derivatives, which can reduce investment risks or give rise to additional risks (including counterparty risk).
- Each fund has specific risks. A comprehensive and detailed description of these risks can be found in the prospectus.

Portfolio commentary

International equity markets once again moved unevenly during the reporting month of August. The Swiss equity market was able to build on the profits of the previous months. We continue to expect a below-average but positive economic development over the rest of the year. The increase in GDP in the USA of +2.8% according to estimates was even a pleasant surprise in the 2nd quarter. However, the prospects for the eurozone remain gloomy. The forecasts for 2024 indicate a further decline in inflation. In Switzerland, this most recently lay within the SNB's target range at +1.3%.

In our Rule-based Investment Solution, there were no transactions in August. The current equity share in the Rule-based Investment Solution thus continues to correspond to the Balanced sub-strategy profile.
