

Monthly report BKB Investment Solution – Sustainable Equities (CHF) V

Fund description

The fund invests the fund assets mainly in other collective investment schemes that in turn invest mostly in assets denominated in Swiss francs. The sustainable Investment Solution will include traditional figures as well as environmental and social criteria in the investment decision.

The investment goal of the BKB Sustainable Equities Investment Solution is primarily to generate long-term real asset growth through capital gains supplemented with potential dividend income. In doing so, greater importance is attached to sustainable investments in Swiss francs.

This investment is suitable for investors who

- mainly wish to profit from gains in share prices,
- are looking at a very long-term investment horizon,
- are prepared to accept very large price fluctuations,
- are also prepared to invest a part in foreign currencies,
- want to invest their capital sustainably.

Allowed is exclusively the investment of funds deriving from vocational pension schemes and tied personal savings in Switzerland (Pillars 2 and 3a) of Basler Kantonalbank.

The investments are within the following ranges (in %):

Breakdown by investment instruments (in %)

Key benefits

- The weightings of the various asset classes are maintained within specific ranges in order to take account of the investor's risk profile.
- Investment decisions are made and implemented in accordance with current market circumstances and by experienced investment experts. Thanks to the best-in-class approach investments are made in the best products on the market and independently of distribution partners.

Risks

- Investments are associated, in particular, with the risk of fluctuations in value and returns.
- The fund may use derivatives, which can reduce investment risks or give rise to additional risks (including counterparty risk).
- Each fund has specific risks. A comprehensive and detailed description of these risks can be found in the prospectus.

Portfolio commentary

The equity markets saw positive developments during the reporting month of September, with the exception of Swiss equities. Fundamentally, nothing has changed. For the rest of the year we continue to expect a below-average but positive global economy. Due to the fall in inflationary pressure and the weakness in the industrial sector, the Swiss National Bank has reduced the key interest rate by 0.25% to 1.00%. A further rate cut is still expected this year. Prior to the move by the Swiss National Bank, the US Federal Reserve (FED) had already reduced its interest rate by 0.50%, which gave a further boost to equities. The high valuations since then and the geopolitical risks in the Middle East and in the USA (upcoming presidential election) have motivated us to take profits and reduce the equity proportion. We have implemented this by reducing Swiss equities to a neutral weighting. Our investment in gold also increased in value again in September and has developed very pleasingly over the course of the year so far.
