Risks

There are several risks associated with investment in the Gate of India Fund, among which are the following:

- The fund invests exclusively in assets which are denominated in other currencies; thus, changes in the relevant exchange rate will affect the value of the investment.
- The fund may invest in smaller company shares which can be more unpredictable and less liquid than those of larger companies.
- The Indian equity market has a higher level of volatility than those of western markets and other developed economies.

For more details on the subject of risks please refer to the latest Offering Memorandum.
