

# DNCA INVEST EUROSE

FLEXIBLE ASSET

## Investment objective

The Sub-Fund seeks to outperform the 20% Eurostoxx 50 + 80% FTSE MTS Global composite index calculated with dividends reinvested, over the recommended investment period. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.

To achieve its investment objective, the investment strategy is based on active discretionary management.

## Portfolio managers comments

The event of the month is undoubtedly the election of D. Trump. Global markets reacted swiftly, incorporating many of the election promises into their valuations, particularly the much-publicized increases in customs duties. Interest rates fell - the German 10-year lost 30bp over the month to end at 2.1%, not far from the year's low point; eurozone equities fell slightly (EURO STOXX 50 NR -0.4%). Investment-grade credit posted the best performance over the month, at +1.6%, still driven by uninterrupted inflows to the asset class.

DNCA Invest Eurose was down slightly over the month (-0.22%), but has risen by 2.5% since the start of the year.

Equities made a negative contribution in November, with BNP Paribas, Sanofi and TotalEnergies the main detractors. During the month, the fund initiated a new position in Fnac Darty (partial conversion of Unieuro shares following the French group's successful takeover bid for the Italian company) and strengthened its position in Piovan. Conversely, the fund reduced its exposure to Coface, Saint-Gobain and Veolia Environnement. At the end of November, the fund's net equity exposure stood at 19.8%, and the portfolio's main holdings were : TotalEnergies (2.7%), Sanofi (1.9%), BNP Paribas (1.8%), Saint-Gobain (1.6%) and Société Générale (1.6%). Hedging accounted for 3.9% (EURO STOXX 50 and CAC 40 futures) and was reduced over the month. The financial characteristics of the portfolio show a P/E for 2025 of 9.1x (EURO STOXX 50 at 13.8x), while the dividend yield for 2025 is estimated at 4.8% (EURO STOXX 50 at 3.1%).

In the bond portfolio, following the abandonment of its planned acquisition of Capri Holdings, US company Tapestry redeems its bonds issued earlier in the year to finance the transaction. Carrier Global redeems its 2025 bonds early, as do TotalEnergies' hybrid, Unicaja's Tier 2 subordinated and Česká spořitelna's senior non-preferred as expected. For valuation reasons, the Banco BPM 9/2026, Fresenius 5/2025 and Enel 11/2025 lines. Crédit Agricole and Intesa Sanpaolo are reinforced on subordinated bonds with respective calls of 2028 and 2031. The primary market offers the opportunity to invest in Kion (5 years at 4.1%), Prysmian (7 years at 4.0%), Stellantis (4 years at 3.4%), Worldline (5 years at 5.4%) and Asmodee, a company games specialist, on high yield (5 years at 5.8%). Lastly, the weighting of convertibles was further strengthened, thanks to opportunistic purchases of short-dated shares in Soitec, GBL and DHL.

The extra-financial characteristics of the portfolio show a responsibility performance of 4.91 and a sustainable transition exposure of 85.3%.

The markets are perhaps integrating D. Trump's campaign promises too quickly. The eurozone is already very pessimistic, both in terms of equities and interest rates. Ongoing monetary easing could breathe new life into the European economy, particularly as regards consumption and the construction sector. Any positive surprises would be very welcome.

**Internal extra-financial analysis**

**ABA coverage rate<sup>+</sup> (95.3%)**

**Average Responsibility Score: 4.9/10**

**Responsibility risk breakdown<sup>(1)</sup>**

**Selectivity universe exclusion rate**

**Transition/CSR exposure<sup>(2)</sup>**

**SDG's exposure<sup>(3)</sup> (% of revenues)**

**Sustainable transitions exposure<sup>(4)</sup>**

**Analysis methodology**

We develop proprietary models based on our expertise and conviction to add tangible value in the selection of portfolio securities. DNCA's ESG analysis model, Above & Beyond Analysis (ABA), respects this principle and offers a rating that we control the entire construction. Information from companies is the main input to our rating. The methodologies for calculating ESG indicators and our responsible investor and engagement policy are available on our website [by clicking here](#).

<sup>(1)</sup> The rating out of 10 integrates 4 risks of responsibility: shareholder, environmental, social and societal. Whatever their sector of activity, 24 indicators are evaluated, such as social climate, accounting risks, suppliers, business ethics, energy policy, quality of management.

<sup>(2)</sup> The ABA Matrix combines the Responsibility Risk and the Sustainable Transition exposure of the portfolio. It allows us to map companies to be mapped using a risk/opportunity approach.

<sup>(3)</sup> 1 No poverty. 2 Zero hunger. 3 Good health and well-being. 4 Quality education. 5 Gender equality. 6 Clean water and sanitation. 7 Clean and affordable energy. 8 Decent work and economic growth. 9 Industry, innovation and infrastructure. 10 Reduced inequalities. 11 Sustainable cities and communities. 12 Sustainable consumption and production. 13 Tackling climate change. 14 Aquatic life. 15 Terrestrial life. 16 Peace, justice and effective institutions. 17 Partnerships to achieve the goals.

<sup>(4)</sup> 5 transitions based on a long-term perspective of the financing of the economy allow the identification of activities with a positive contribution to sustainable development and to measure the exposure of companies in terms of turnover as well as exposure to the UN Sustainable Development Goals.

\*The coverage rate measures the proportion of issuers (equities and corporate bonds) taken into account in the calculation of the extra-financial indicators. This measure is calculated as a % of the net assets adjusted for cash, money market instruments, derivatives and any vehicle outside the scope of "listed equities and corporate bonds".

Source : MSCI

It should be noted that DNCA Finance changed its non-financial data provider in October 2023 from monitoring negative externalities by the Scope Rating provider to monitoring performance indicators (PAI) by the MSCI provider. This change of supplier and indicator typology prevents DNCA Finance from producing a 3-year ESG performance comparison. DNCA Finance Committed to produce this historical data from the data available in December 2023.

A summary of investors' rights is available in English at the following link: <https://www.dnca-investments.com/en/regulatory-information>

This product promotes environmental or social characteristics, but does not have as its objective a sustainable investment. It might invest partially in assets that have a sustainable objective, for instance qualified as sustainable according to the EU classification.

This product is subject to sustainability risks as defined in the Regulation 2019/2088 (article 2(22)) by environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

If the portfolio investment process can incorporate ESG approach, the portfolio's investment objective is not primarily to mitigate this risk. The sustainability risk management policy is available on the website of the Management Company.

The reference benchmark as defined in the Regulation 2019/2088 (article 2(22)) does not intend to be consistent with the environmental or social characteristics promoted by the fund.

## Glossary

**Beta.** Measures the average extent to which a fund moves relative to the broader market. The beta of a market is 1. A fund with a beta of more than 1 moves on average to a greater extent than the market. A fund with a beta of less than 1 moves on average to a lesser extent. If beta is a minus number, it is likely that the stock and the market move in opposite directions.

**Convertible Bond.** Hybrid securities that have both bond and equity characteristics. Convertible bonds make periodic interest payments like a bond, but bondholders also get an option to exchange their bonds for a specified number of shares of common stock. Convertible bonds typically carry lower coupon rates, thus reducing the corporation's cost of borrowing.

**Correlation coefficient.** The correlation coefficient is a measure of correlation. It is used to determine the relationship between two assets over a given period. A positive coefficient means that the two assets move in the same direction. Conversely, a negative coefficient means that the assets move in the opposite direction. The correlation or decorrelation can be more or less strong and varies between -1 and 1.

**Delta.** The delta of a position expresses the change in the price of an option when its underlying asset price varies. It corresponds to the derivative of the theoretical value of the option relating to the price of the underlying asset.

**Maturity.** The time when a bond or other debt instrument is due to for redemption (is due to mature); or the length of time between the issue of such an instrument and the date it is due for redemption (the maturity date).

**Sensitivity.** The sensitivity of a bond measures the change in its percentage value induced by a given change in interest rates.

**Sharpe Ratio.** A way of measuring the historical risk-adjusted return on an investment. It is the average previous return minus the risk-free return, divided by the standard deviation (a measure of risk that looks at the diversion of actual returns from expected returns).

**Sharpe Ratio.** The Sharpe ratio measures the excess return over the risk-free money rate of an asset portfolio divided by the standard deviation of that return. It is therefore a measure of the marginal return per unit of risk. It is used to measure the performance of managers with different risk policies.

**Tracking error.** Tracking Error is a measure of how closely an investment portfolio follows the index against which it is benchmarked. It is the difference in the return earned by a portfolio and the return earned by the benchmark against which the portfolio is constructed. For example, if a bond portfolio earns a return of 5.15% during a period when the portfolio's benchmark (say, for example, the Lehman Brothers Index) produces a return of 5.06%, the tracking error is .09%, or 9 basis points.

## Additional notes

This material has been provided for information purposes only to investment service providers or other Professional Clients, Qualified or Institutional Investors and, when required by local regulation, only at their written request. This material must not be used with Retail Investors. It is the responsibility of each investment service provider to ensure that the offering or sale of fund shares or third party investment services to its clients complies with the relevant national law.

Please read the Prospectus and Key Information Document carefully before investing. If the fund is registered in your jurisdiction, these documents are also available free of charge and in the official language of the country of registration at the Natixis Investment Managers website ([im.natixis.com/intl/intl-fund-documents](http://im.natixis.com/intl/intl-fund-documents)).

To obtain a summary of investor rights in the official language of your jurisdiction, please consult the legal documentation section of the website ([im.natixis.com/intl/intl-fund-documents](http://im.natixis.com/intl/intl-fund-documents)).
