Candriam Sustainable Equity Emerging Markets, a sub-fund of the SICAV Candriam Sustainable

Class I - Capitalisation shares: LU1434524333

Competent authority: CSSF (Commission de Surveillance du Secteur Financier)
Management company: Candriam

OBJECTIVES AND INVESTMENT POLICY

Principal assets traded:

Shares of companies with their registered office and/or their principal activities in the emerging countries.

Investment strategy:

The fund seeks to achieve capital growth by investing in the principal assets traded and to outperform the benchmark.

The management team makes discretionary investment choices on the basis of an economic/financial analysis process as well as on a Candriam's proprietary analysis of Environmental, Social and Governance (ESG) considerations, both indicative of risks and long-term opportunities.

The fund's sustainable investment objective is to contribute to reducing greenhouse gas emissions through specific targets as well as the integration of climate related indicators in issuer and securities analysis. The fund also aims to have long-term positive impact on environment and social objectives. More specifically the fund aims to achieve overall greenhouse gas emissions at least 30% lower than those of the benchmark.

To achieve these objectives the fund implements a combination of positive selection of the best issuers based on ESG criteria, exclusion of issuers detrimental to these objectives or deemed to prone to controversies.

Issuers are subject to a two-pronged analysis considering how issuers activities contribute to achieving sustainable objectives on the one hand, and how issuers' operations and policies align with the interests of their key stakeholders on the other hand. The result of this analysis forms the basis to define the investable universe and guide fund managers in their portfolio construction.

This analysis is enriched by the results of dialogs led with issuers.

This investment approach will cause the fund to avoid certain issuers due to their poor ESG quality or contribution to attaining sustainability objectives. Whilst the manager believes that such issuers are likely to lose out to more sustainable ones over the long term, market volatility and short term market trends could result in such issuers outperforming more sustainable ones over shorter periods.

RISK AND REWARD PROFILE

- The risk level shown reflects the fund's historical volatility, completed where applicable by that of its reference framework. The volatility indicates the extent to which the value of the fund may fluctuate upwards or downwards.
- The historical data may not be a reliable indication for the future.
- The indicated category may vary over time.
- The lowest category does not mean "risk-free".
- There is no guarantee or mechanism to protect the capital.

The investor needs to be aware of the following significant risks which are not necessarily adequately taken into account by the indicator:

For further information, please refer to Candriam's website and/or the prospectus.

The fund may use derivative products both for investment and hedging purposes (hedging against unfavourable future financial events).

Benchmark: MSCI Emerging Markets (Net Return)

The fund is actively managed and the investment approach implies a reference to a benchmark.

Benchmark definition: The index measures the performance of the large and mid-capitalization equity segment across emerging markets countries.

Use of the benchmark:

- as investment universe. In general, the majority of the fund's financial instruments are part of the benchmark. This said, investments outside this benchmark are admitted,
- in the determination of risk levels/parameters,
- for performance comparison,
- for performance fees calculation for certain share classes if applicable.

Deviation level of the portfolio composition from the benchmark:

The fund being managed actively, its objective is not to invest in all constituents of the benchmark, nor to invest to the same extent in the constituents of the benchmark. Under normal market conditions, the tracking error of the fund will be moderate to important this is comprised between 2% and 6%.

This measure is an estimation of the deviation of the fund's performance compared to the performance of the benchmark. The more the tracking error is important, the more deviations compared to the benchmark are important. The effective tracking error depends notably on the market conditions (volatility and correlations between financial instruments) and can deviate from the expected tracking error.

Redemption of shares: On request, every day, in Luxembourg.

Allocation of income: Reinvestment.

Recommendation: This fund may not be suitable for investors who plan to withdraw their capital within 6 years.

• **Emerging countries risk:** emerging countries may experience political, legal or fiscal uncertainties or other events that could impact negatively on the assets of the fund. The assets traded in these countries may be subject to market movements that are potentially more rapid than in the major international markets and listing differentials that may be considerably bigger under certain market conditions. These assets may prove to be less liquid and may not be able to be sold quickly and at reasonable prices. Exchange rate fluctuations involving the currencies of emerging countries may be sudden and substantial.

• **Liquidity risk:** the fund may invest in securities and/or market segments that may be less liquid, in particular in certain market circumstances, with the result that securities cannot be liquidated quickly at reasonable prices.

• **Risks associated with Chinese A equities:** This specific market segment is subject to severe and changing access restrictions, limited liquidity and operational and regulatory risks regarding the trading, settlement and custody of securities. The specific risk associated with the renminbi and uncertainties around tax changes also need to be considered.
