### What is this product?

#### TYPE OF PRODUCT

The product is a sub-fund of UNI-GLOBAL, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

#### TERM

The Sub-Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

#### OBJECTIVES

The sub-fund offers the chance to take advantage of the opportunities that arise on the equity markets of the emerging countries. The sub-fund seeks to build up a portfolio offering the best possible ratio between the estimated risk and the expected return. The sub-fund invests according to an active approach which involves identifying the portfolio with the optimum estimated risk for the universe in question.

The sub-fund is actively managed and references MSCI Emerging Markets Index (the "Index") for comparison purposes only. The Investment Manager has full discretion with regard to the implementation of the sub-fund's investment strategy, which is not linked to the Index. There are no restrictions on the extent to which the sub-fund's portfolio and performance may deviate from the ones of the Index.

The Sub-fund promotes environmental and social characteristics according to article 8 of the Regulation (EU) 2019/2088.

The sub-fund consists of at least 51% of equities or other capital stock (e.g. shares in cooperatives, participation or bonus certificates, etc.) and any other types of holdings that qualify as securities in companies registered or carrying out a significant part of their business in emerging countries, known as transferable securities.

The sub-fund may also invest up to 50% of its total net assets in China A Shares through the use of the Stock Connect and in China H Shares.

The Investment Manager mandatorily applies on a continuous basis an ESG integration and risk management methodology to determine the eligibility of companies for investment in the sub-fund so as to enhance the portfolio towards assets with better ESG scoring and try to reduce exposure to assets with worst ESG scores.

Some of the markets in these emerging countries are not currently considered as regulated markets pursuant to article 41 (1) of the UCITS Law, and investments in these markets, together with investments in unlisted securities, must not exceed 10% of the net assets.

Russia is one such market, with the exception of the Moscow Interbank Currency Exchange ("MICEX-RTS"), which is considered as a regulated Russian market on which direct investments may exceed 10% of net assets.

Subject to the provisions set out in this Prospectus, the sub-fund may hold ancillary liquid assets (i.e. bank deposits at sight, such as cash held in current accounts with a bank accessible at any time) up to 20% of its net assets for treasury purposes.

In order to achieve its investment goals, the sub-fund may hold a maximum of 10% of its net asset value in units of UCITS or other UCIs.

In order to achieve its investment goals, the sub-fund may invest up to 10% of its net asset value in REITs.

The sub-fund may use derivatives to hedge against currency risk, and/or to enhance effective management.

The share class is denominated in EUR.

The sub-fund is denominated in USD.

These shares are capitalisation shares. Income and capital gains are reinvested.
