# JOHCM UK Dynamic Fund

Y GBP IE00BDGKPZ46

A sub-fund of J O Hambro Capital Management Umbrella Fund plc  
Managed by JOHCM Funds (Ireland) Limited

### Objectives and investment policy

- The Fund's investment objective is to achieve capital growth over a rolling seven to ten year period as well as providing income. The Fund's target is to have a return greater than the FTSE All-Share Total Return Index (12pm adjusted), which is used in the calculation of performance fees.
- At least 75% of the Fund's assets will at all times be invested in equity securities of companies domiciled or exercising the predominant part of their economic activity in the United Kingdom. The Fund may on occasion utilise this position to invest a proportion of its assets in equities listed on a recognised exchange outside the UK. The Fund may on occasion invest up to 25% of its assets in non-UK companies which may be located anywhere globally but whose securities will be listed or traded on a recognised exchange. Investment will be made primarily in equity securities which are readily marketable, but investments will also be made in equity securities of smaller companies which can be more lightly traded. The portfolio is likely to be fairly concentrated with the Fund typically holding equity interests of between 35 and 50 different companies.
- The Fund promotes environmental and social characteristics throughout the investment decision making process.
- The Fund is actively managed which means that the fund managers use their expertise to pick investments to achieve the objective of the Fund.
- Performance of the Fund may be measured against the FTSE All-Share Total Return Index (the "Index"). The Index is used as a target benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. The use of the Index does not limit the investment decisions of the fund manager so the shareholdings of the Fund may differ significantly from those of the Index, however it may influence the weightings of investments in components of the Index. The Index is used as it is the broadest available index of shares listed on the London Stock Exchange, representing at least 98% of the market value of the shares listed.
- Any income the Fund generates for this share class will be reinvested semi-annually to grow the value of your investment unless you elect for a cash dividend.
- You can buy and sell shares in the Fund on any day which is a working day in Dublin. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within five years.
- Index data: FTSE International Limited ("FTSE") © FTSE 2019. "FTSE®" is a trade mark of the London Stock Exchange Group companies and is used by FTSE International Limited under licence. - The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on simulated historical performance data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- As this share class has not been in existence for 5 years, simulated performance data has been used.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.

- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the Fund value may be affected by:

- Changes in exchange rates between currencies may cause the value of the investments to diminish or increase.
- Any change in the Company's tax status or in legislation could affect the value of investments held by the Company.
- Political and /or regulatory Risks
- Liquidity risk: The risk that some securities held by the Fund may be difficult or impossible to sell at the desired time and price. The Fund's investments include shares in small-cap companies. Small-cap companies tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile.
- Investors should note that a more detailed description of risk factors is set out in full in the prospectus.
