First Trust Low Duration Global Government Bond UCITS ETF

A sub-fund of First Trust Global Funds plc (the "Company")

First Trust Global Portfolios Management Limited is the manager of the Company (the "Manager")

ISIN: IE00BKS2X317

Share class: Class C EUR DIST

Objective and Investment Policy

Objective: The fund's investment objective is to deliver to investors total returns over the medium to long term by investing in sovereign fixed income securities globally.

It is recommended that an investment in the fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The fund intends to pursue an actively managed investment strategy. The fund invests primarily in sovereign fixed income securities and will seek to minimize the effect of the underlying currency exposure of those securities by utilizing currency hedging transactions. The fund may also use interest rate financial derivative instruments in order to manage and hedge its interest rate exposure. The financial derivative instruments used may be forward foreign exchange contracts, currency futures, interest rate futures and interest rate swaps.

The sovereign fixed income securities in which the fund may invest may be in developed or emerging markets countries (including Russia), will be issued by governments, local authorities, supranational organisations and public sector bodies, and will be rated investment grade at the time of purchase. The fund's exposure to below investment grade will be capped at 30% of its net asset value. Under normal market conditions, the weighted average duration of the fund's portfolio is likely to range between two and four years.

The fund will use exchange-traded and over the counter financial derivative instruments (forward foreign exchange contracts, currency futures, interest rate

swaps and interest rate futures), each as described in the fund's Prospectus, in order to manage and hedge the currency, interest rate and foreign exchange rate risk exposures of the fund. The fund will also use interest rate swaps and interest rate futures for investment purposes. The fund may take active long and short currency positions in a particular currency which may not be denominated in the fund's base currency, some of which may operate as a hedge of its currency exposure. The fund will seek to hedge the currency exposures of the sovereign fixed income securities using financial derivative instruments to minimize the impact of fluctuations in those currencies' values versus the base currency of the fund. The fund will seek to use financial derivative instruments for investment purposes and/or to manage the fund's overall exposure to interest rate risk arising from its holdings.

For more information about the investment policy, see "Investment Policy" in the Fund's section on supplement available at www.ftglobalportfolios.com.

You may sell your shares usually on each business day (a day on which the London Stock Exchange is open) by sending your request to the administrator.

It is intended to declare dividends on a quarterly basis.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short term.

Risk and Reward Profile

The risk category is based on simulated and historical data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The indicator is designed to help investors understand the uncertainties for both loss and for growth that may affect their investment. The lowest category does not mean that the investment is risk free.

The Fund is in category 3 as the investments of the fund are concentrated in units of exchange traded investment funds and because funds of this type have experienced low to medium rises and falls in value in the past.

The following risks are materially relevant to the Fund which may not be adequately captured by the indicator:

The Fund may not achieve its investment objective and the value of shares in the Fund may fall.

Bond prices and returns from investing in bond markets are sensitive to changes in interest rates which are in turn determined by a number of economic factors, in particular market expectations of future inflation. Investment in bonds also results in exposure to the risk that the bond issuer defaults on its obligations which is likely to result in a loss of value for the bondholder. Higher yielding bonds and emerging market bonds are generally perceived to carry a higher risk of default and a greater possibility of loss to the Fund.

The fund may invest in schemes which are substantially leveraged and any event which may adversely affect the value of the underlying scheme could significantly affect the assets of the fund.

See also the description of the risks applicable to the Fund in "Risk Factors" in the Fund's Prospectus and supplement thereto.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None*
Exit charge	None*
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.55%
Charges taken from the fund under certain specific conditions	
Performance fee	None

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the fund will pay related transaction costs. Authorised participants switching between the fund and other funds within the Company will be subject to a switching fee of up to 3% of the Net Asset Value per share.

Any entry and exit charges shown are maximum figures, and in some cases investors may pay less. You can find out the actual charges from your financial adviser or distributor.

A switching charge of up to 3% may be payable for switching shares (except in the case of an entry/exit charge paid by the fund when buying or selling units in another sub-fund).

The ongoing charges figure shown here is an estimate of the charges. An estimate is being used since the Investment Manager agreed to voluntarily limit the total ongoing charges to the number shown, which is net of a fee waiver of 0.10% of the annual management fee currently provided for in the Prospectus. The annual management fee will revert to the gross figure upon the expiry of the fee waiver. See the section in the fund’s Prospectus entitled “Fees, Costs and Expenses” for further information. The annual report for each financial year will include detail on the exact charges made. The ongoing charges figure also excludes portfolio transaction costs. The figure may vary from year to year.

In the event that the Fund’s operational expenses exceed the stated ongoing charges figure of 0.55%, the investment Manager shall discharge any excess out of its own assets.

The ongoing charges figure is based on the fund’s annual management fee, whereby the Investment Manager shall be responsible for the fund’s operational expenses.

For more information about charges, please see “Fees, Costs and Expenses” in the Prospectus.
