First Trust Vest U.S. Equity Moderate Buffer UCITS ETF – February

A sub-fund of First Trust Global Funds plc (the "Company")

First Trust Global Portfolios Management Limited is the manager of the Company (the "Manager")

ISIN: IE000X8M8M80

Share class: A USD ACCU

Objective and Investment Policy

Objective: The Fund seeks to provide investors with returns (before fees, expenses and taxes) that match the price returns of the S&P 500 Index (the "Index"), up to a predetermined upside cap, while providing a buffer (before fees and expenses) against the first 15% of Index losses (the "Buffer"), over a specified approximately one-year time period (the "Target Outcome Period").

Investment Policy: The Fund intends to pursue an actively managed investment strategy and will seek to achieve its investment objective by investing substantially all of its assets in FLEXible EXchange Options ("FLEX Options") that reference the performance of the Index. The Fund will primarily invest in financial derivative instruments for investment purposes. FLEX Options are customised equity or index put and call option contracts that are cleared by the Options Clearing Corporation (the "OCC") and traded on Regulated Markets in the US (and in particular the Cboe Options Exchange).

The Fund seeks to provide a buffer on the first 15% of Index losses at the end of each Target Outcome Period. If the Index has decreased in value by more than 15% over the Target Outcome Period, the Fund will experience subsequent losses on a one-to-one basis (before fees and expenses). The Buffer and the Upside Cap will both be reduced by the Annual Management Fee, as well as any brokerage commissions, trading fees, taxes and extraordinary expenses not included in the Fund's Annual Management Fee.

The returns of the Fund are subject to a cap for the Target Outcome Period. The fund's Upside Cap is available on the Fund's website. Unlike other investment products, the potential returns an investor can receive from the Fund are subject to the pre-determined Upside Cap that represents the maximum percentage return an investor can achieve from an investment in the Fund for an entire Target Outcome Period (before fees and expenses). In the event the Index experiences gains over a Target Outcome Period, the Fund seeks to provide investment returns that match the percentage increase of the Index, but any percentage gains over the amount of the Upside Cap will not be experienced by the Fund or its investors. Therefore, regardless of the performance of the Index, the Upside Cap for the Fund is the maximum percentage return an investor can achieve from an investment in the fund for that Target Outcome Period.

To achieve the target outcomes sought by the Fund for a Target Outcome Period, an investor must hold shares in the Fund for that entire Target Outcome Period. An investor that purchases shares in the Fund other than on the first day of the Fund's Target Outcome Period and/or sells shares in the Fund prior to the end of the Fund's Target Outcome Period may experience results that are very different from the target outcomes sought by the Fund for that Target Outcome Period. Investors purchasing shares of the Fund after the Target Outcome Period begins can see their expected outcome (the remaining cap and buffer on a given day) until the end of the Target Outcome Period by clicking on the Fund's name on the First Trust Target Outcome UCITS Funds website at <https://www.ftglobalportfolios.com/Professional/Etf/TargetOutcomeFundList.aspx>

The Fund seeks to achieve specified outcomes but there is no guarantee that the outcomes for a Target Outcome Period will be achieved. You may lose some or all of your money by investing in the Fund.

For more information about the investment policy, see "Investment Policy" in the Fund's section on supplement available at www.ftglobalportfolios.com.

You may sell your shares usually by sending your request to the administrator on any day on which the London Stock Exchange is open for business.

Income is reinvested into the Fund for this share class.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short term.

Risk and Reward Profile

The risk category is based on simulated and historical data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The indicator is designed to help investors understand the uncertainties for both loss and for growth that may affect their investment. The lowest category does not mean that the investment is risk free.

The Fund is in category 4 as the investments of the fund are concentrated in units of exchange traded investment funds and because funds of this type have experienced average rises and falls in value in the past.

The following risks are materially relevant to the Fund which may not be adequately captured by the indicator:

The Fund may not achieve its investment objective and the value of shares in the Fund may fall.

See also the description of the risks applicable to the Fund in "Risk Factors" in the Fund's Prospectus and supplement thereto.
