

Picard Angst Funds

Energy & Metals Fund

Share Class Ph

(CHF hedged, Institutional)

Data as of 31.10.2023

Investment Strategy and Objective

Performance and risk characteristics of the fund approximate the systematic commodity investment strategy "Picard Angst Energy & Metals Commodity TR" (PNMI TR) supplemented by a dynamic approach to the selection of optimal contract maturities (PNMI Adaptive Roll). A limited risk budget allows for market views to be expressed through the overweighting or underweighting of specific sectors or components. Exclusive use of exchange-traded and centrally cleared commodity futures ensures cost-efficient implementation. The fund does not make use of OTC derivatives on commodities such as total return swaps.

The broadly diversified, balanced and liquid investment strategy aims to reflect the general trend of the asset class of commodities while offering a return and risk profile that is superior to standard commodity benchmarks. Low correlations with traditional asset classes, make the fund a suitable addition to a portfolio dominated by allocations to equities and bonds serving the objective of improving portfolio diversification and enhancing risk-adjusted portfolio returns.
