Investment Objective

Dominicé - US Equities Plus (DUEP) employs a quantitative strategy with an objective to provide optimal exposure to the US equity market. The fund aims to generate superior returns by leveraging behavioral finance biases, including seasonality, myopia and trend. Registered in Switzerland, DUEP invests in equities and listed derivatives.

Investment Manager

Dominicé & Co – Asset Management is an investment management firm founded in 2003 in Switzerland. The company offers investment solutions in volatility, equities and real estate, as well as wealth management services.

Strategy Commentary

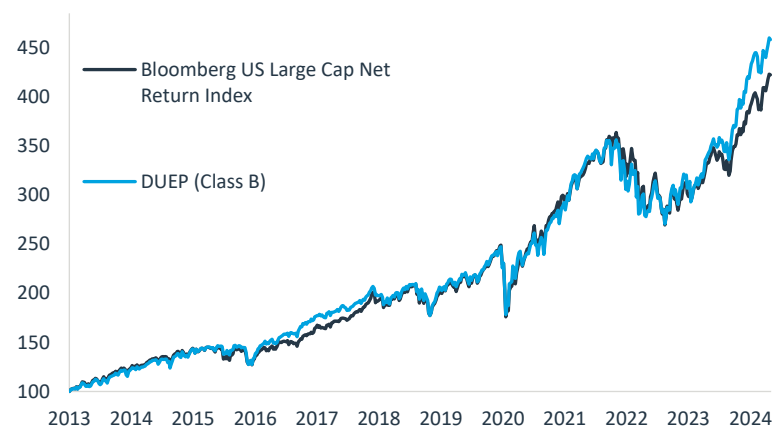

Thanks to the technology sector, which continued to outperform, US equities continued their march higher in June. The S&P 500 increased 3.5% over the month and reached new all-time highs. High expectations around AI were met by tech firms that have been delivering and beating already high earnings expectations. The CPI rose 0.2% for the month, bringing the annual inflation rate to 3.3%. The inflation has been trending downward with core inflation remains elevated at 3.5%. As a result, the Fed decided to maintain rates at their current level. The updated dot plot indicates one or two rate cuts by the end of the year. The Fund outperformed its benchmark by 0.2% over the month. The stock selection was positive. In particular with the overweight in Autodesk (+22.7%) which rebounded over the month after an activist investor revealed it has built a large stake in the global software firm. On the derivatives overlay program, VIX futures strategies suffered because of unstable trading conditions in part explained by the dissolution of the French parliament following the European election. This loss was partially offset by strategies active on options, which continued to perform well and contribute to the outperformance.

Opinions expressed herein may not be shared by all employees of Dominicé & Co and are subject to change without notice. Past performance is not a guide to future performance. Performance data do not take account of the commissions and costs incurred on the issue and redemption of units. Dominicé – US Equities Plus is not for distribution in the US or to US Persons. This document is not intended, and should not be construed as, marketing of any alternative investment fund for the purposes of any legislation implementing EU Directive 2011/61/EU on Alternative Investment Fund Managers (the "AIFM Directive") in any member state (each a "Member State") of the EEA. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closedend funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Dominicé US Equities Plus was rated against the following numbers of EAA Fund US Large-Cap Blend Equity funds over the following time periods 1'685 funds in the last three years, 1'364 funds in the last five years, and 770 funds in the last ten years. Past performance is no guarantee of future results.
