Synthetic Risk & Reward Indicator (SRRI)

Market Outlook

For the month of February Indian equity markets mirrored gains of the global peers on the back of gradual improving economic outlook. Better than expected quarterly earning numbers, upbeat economic data and optimism regarding the roll out of the COVID-19 vaccine program.

Investors also cheered after the Government unveiled the Union Budget for FY22. Market participants celebrated a - budget, amid reports of a COVID-19 tax/cess gaining ground in the run up to the Union Budget. The policy stance of the Monetary Policy Committee, better than expected macroeconomic numbers and strong corporate earning numbers too generated positive vibes.

FILs recorded net inflows of US\$2.6bn into Indian equities in March, the sixth consecutive month of inflows. Q1 saw \$7.6bn of inflows. This followed the highest quarterly inflows by FILs in 4Q20 (US\$19.3bn). FILs remained net sellers in the debt markets with outflows of US\$756mn in March (vs outflows of US\$986mn in February). DILs turned net equity buyers in March (+\$715mn, vs -\$2.2bn in Feb), post a five-month consecutive outflows streak. Both Mutual funds (-\$17mn) and insurance funds (-\$331mn) were net sellers in March. Mutual fund and insurance fund flow data is as of 16 March.

There could be high possibility that it may take longer than expected to return to normalcy given the fears of a new strain and second wave of Covid in the country. Also, if the money supply tightens in the US with an increase in interest rates to curb inflationary pressures, money might be routed towards the US instead of India. Lastly, post the COVID-19 recovery phase, geopolitical risks in the form of prolonged US-China tensions can come back to focus.

Overall, given that we are in the early stages of an economic recovery, monetary and fiscal policy remains supportive, the earnings rebound has been sharp, relative valuations are still favorable, and FI flows continue to be strong, we maintain our overweight to equities. Our view remains that the rally in equity markets should continue in the longer term and the ongoing correction can give them a good opportunity to add equities to their portfolio.

Fund Performance (as on 31st March 2021)

Period	IFEF	MSCI India	Outperformance
1 Month	0.9%	2.2%	-1.3% ↓
3 Months	4.5%	4.9%	-0.4% ↓
