⁴ Reference Index in currency of share class (without costs)

In spite of mixed signals amid strong economic data and hawkish Fed messaging, US equities delivered positive returns overall in January. DeepSeek's announcement put US tech names under pressure, increasing uncertainty and adding volatility during the last week of the month.

Monthly performance

In January the fund performed positively with 4.3%. Performance was supported by the sustainable agriculture and healthcare themes, while the energy theme detracted.

YTD performance

YTD as of the end of January, the fund has delivered a positive performance of 4.3%. Please refer to the monthly performance comments above.

Performance contributors

The fund benefited from an overweight position in Mowi after the company reported a 12% outperformance versus the consensus in relation to operational EBIT for Q4 2024. Outstripping the consensus forecast on this scale should help de-risk margins for H1 2025 and has made Mowi's risk/reward profile more attractive for investors.

Performance detractors

An overweight position in China Mengniu Dairy weighed on performance due to weaker demand for premium fresh milk and yoghurt amid limited consumer spending. The dairy industry is suffering from an excess supply of raw milk and tight competition, making it a harsher market to operate in.
