**Unsurprisingly, Donald Trump's decisive victory in the US presidential election in combination with a red sweep was the dominant market driver in November. While US equities reached new all-time highs, equities in China, Japan and Switzerland experienced slight declines. For their part, eurozone stocks were flat.**

### Monthly performance

In November the fund performed positively with 0.7%. Performance was supported by stock selection in the sustainable energy theme, while the sustainable agriculture, healthcare and food themes detracted.

### YTD performance

YTD as of the end of November, the fund has delivered a positive performance of 4.9%. Performance has been supported by positive stock selection in healthcare, while the water, food and sustainable energy themes have detracted.

### Performance contributors

The fund benefited from an overweight position in Vertiv Holding. The company raised its earnings forecasts for the coming five years during its capital markets day, also detailing strategic investments ahead of AI data centre deployments.

### Performance detractors

The overweight in US residential solar companies such as Sunrun and Enphase weighed on performance. The political shift has increased uncertainty regarding potential amendments to tax credits, as well as concerns about inflation and long-term interest rate expectations.

## Current investment strategy

The strategy is focused on the bottom-up stock selection of companies that benefit from long-term thematic trends. The fund's largest exposures are to companies engaged in areas such as healthcare, sustainable agriculture, energy and water consumption.

## Risks

A new fund with no track record, notwithstanding the investment history of the portfolio managers. An equity fund with exposure emerging economies and to small, growing and innovative companies which can result in significant fluctuations in value, particularly in the short term. The thematic focus may lead to concentrations in a specific sector. The performance of actively managed funds may deviate significantly from the referenced index. The fund can use derivatives, which may result in additional counterparty and liquidity risks. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.
