## Performance **Review**

UBS (Lux) Equity SICAV - Global High Dividend Sustainable (USD) Q-acc

**The Fed began its easing cycle in September, with a 50 basis point cut to rates. On the other side of the world, China's Politburo announced measures to support the housing market, capital markets and consumers. Global equity markets had another positive month.**

### Monthly performance

In September the fund performed positively with 1.3%. The fund benefited from its exposure to high dividend-yielding and low-growth stocks. Stock selection and global market exposure were also positive. Meanwhile, country and sector allocations were negative.

### YTD performance

YTD as of the end of September, the fund has delivered a positive performance of 17.2%. So far in 2024, the fund's exposure to earnings yield and dividend yield has been positive for performance, as have its global market exposure and stock selection. The country and sector allocations have detracted in the year to date.

### Performance contributors

The fund's allocations to China and Australia, as well as its exposure to the utilities and real estate sectors, drove positive performance. Its allocations to high dividend yield and low growth contributed to performance. At the stock level, the fund benefited from holding Gree Electric and Fortescue.

### Performance detractors

The fund's allocations to the US and Japan, as well as its exposure to the information technology and energy sectors, detracted from performance. Its exposures to high earnings yield and low beta were negative for performance. The fund's holdings in Shell and Valero Energy both detracted from performance.

## Current investment strategy

We continue to follow our investment approach, investing globally in high-dividend and high-quality stocks and holding a very well diversified and defensive portfolio across countries and sectors. We believe that these factors will add value to the fund over the mid to long term.

## Risks

UBS Equity Funds invest in equities and may therefore be subject to high fluctuations in value. As these UBS funds pursue an active management style, each fund's performance can deviate substantially from that of its reference index. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company.
