## Performance **Review**

UBS (Lux) Equity SICAV - Euro Countries Income Sustainable (EUR) (CHF hedged) P-dist

**In September, China's Politburo announced measures to support markets and consumers following the Fed's 50 basis point cut in rates. European equities should benefit from China's stimulus, but Germany's economy is weakening and there are still manufacturing headwinds that make for a mixed outlook.**

### Monthly performance

In September the fund performed positively with 0.1%. Country allocation, stock selection, sector allocation and exposure to the European market all added value in September. Exposure to low-beta stocks detracted. The call overlay was negative in September.

### YTD performance

YTD as of the end of September, the fund has delivered a positive performance of 8.6%. In the year to date, the fund has benefited from exposure to low volatility and high liquidity. Stock selection and market exposure have been favourable, while the sector and country allocations have been negative. The call overlay has detracted in 2024 to date.

### Performance contributors

The fund's allocation to Germany and Spain as well as its exposure to the utilities and financial sectors added value. Furthermore, its exposure to low residual volatility and high investment quality boosted returns. At the stock level, Rexel and Iberdrola were positive contributors.

### Performance detractors

The fund's exposure to Austria and Italy, as well as to the energy and information technology sectors, were negative for performance. The exposure to low-beta and European companies detracted from performance. At the stock level, the fund suffered due to holding Merck and Galp Energia. The call overlay was negative.

## Current investment strategy

We continue to follow our investment approach, investing in high-dividend and high-quality stocks while holding a very well diversified and defensive portfolio across countries and sectors. We believe that these factors will add value to the fund over the mid to long term.

## Risks

UBS Equity Funds invest in equities and may therefore be subject to high fluctuations in value. As these UBS funds pursue an active management style, each fund's performance can deviate substantially from that of its reference index. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). In distributing share classes, the equity yield, net of fund fees, will be distributed. The distributing (-dist) share classes of this fund intend to distribute capital as well as income (e.g. from dividends). Investors in some jurisdictions may incur a higher rate of tax on distributed capital than on any capital gains which are realized on disposal of fund shares. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared to distributing (-dist) share classes. Investors should seek their own tax advice. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company.
