

UBS Euro Countries Income Sustainable Equity Fund EUR

Performance **Review**

UBS (Lux) Equity SICAV - Euro Countries Income Sustainable (EUR) (USD hedged) QL-dist

European markets rose in January on the back of a dovish stance from the ECB and signs that economic sentiment had bottomed out in 2024. The focus is now on the new US administration and the possible impact of tariffs on countries in Europe.

Monthly performance

In January the fund performed positively with 5.5%. In January, market exposure, country allocation and stock selection were all positive in terms of fund performance. Sector allocation, exposure to domestic European companies and the call overlay detracted from performance.

YTD performance

YTD as of the end of January, the fund has delivered a positive performance of 5.5%. Please refer to the section above.

Performance contributors

Companies with high dividend yields and low volatility were positive in terms of fund performance in January. Exposure to Germany and Spain, as well as the allocations to the information technology and healthcare sectors, added value. At the stock level, SAP and Generali were positive contributors for the month.

Performance detractors

In January, allocations to the Netherlands and Ireland, as well as the utilities and consumer staples sectors, detracted from performance. The exposures to domestic Europe and high ESG stocks, together with the call overlay, were all negative in terms of performance. At the stock level, holdings in Puma and Sodexo detracted from performance over the month.

Current investment strategy

We continue to follow our investment approach, investing in high-dividend and high-quality stocks while holding a very well diversified and defensive portfolio across countries and sectors. We believe that these factors will add value to the fund over the mid to long term.

Risks

UBS Equity Funds invest in equities and may therefore be subject to high fluctuations in value. As these UBS funds pursue an active management style, each fund's performance can deviate substantially from that of its reference index. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). In distributing share classes, the equity yield, net of fund fees, will be distributed. The distributing (-dist) share classes of this fund intend to distribute capital as well as income (e.g. from dividends). Investors in some jurisdictions may incur a higher rate of tax on distributed capital than on any capital gains which are realized on disposal of fund shares. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared to distributing (-dist) share classes. Investors should seek their own tax advice. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company.
