

UBS US Income Sustainable Equity Fund USD

Performance Review

UBS (Lux) Equity SICAV - US Income Sustainable (USD) QL-dist

The US large cap equity market delivered a positive performance in November 2024, producing its best monthly return in 2024 to date. Equity markets rallied as the US elections went smoothly and a Republican sweep of the presidency and Congress boosted hope of a business-friendly environment.

Performance (basis USD, net of fees)¹

Monthly performance

In November the fund performed positively with 5.3%. The fund lagged the broad US stock market due to defensive positioning, its overweight in value stocks and its underweight in high-momentum stocks.

YTD performance

YTD as of the end of November, the fund has delivered a positive performance of 15.4%. The fund is lagging the broad US stock market due to defensive positioning, poor stock selection, the covered call overlay and its underweight in high-momentum stocks.

Performance contributors

All sector exposures contributed to fund performance this month. At the stock level, the fund benefited from holding McKesson, GoDaddy and Ameriprise Financial.

Performance detractors

No sector exposures detracted from the fund's performance this month. At the stock level, the fund was negatively impacted by holding CA Healthcare, Qualcomm and General Mills. The call overlay also detracted.

Past performance is not a reliable indicator of future results.

Current investment strategy

We continue to follow our investment approach, investing in high total yield and high-quality stocks and holding a well-diversified and defensive portfolio across countries and sectors. We believe that these factors will add value to the portfolio over the mid to long term.

Risks

UBS Equity Funds invest in equities and may therefore be subject to high fluctuations in value. As these UBS funds pursue an active management style, each fund's performance can deviate substantially from that of its reference index. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). In distributing share classes, the equity yield, net of fund fees, will be distributed. The distributing (-dist) share classes of this fund intend to distribute capital as well as income (e.g. from dividends). Investors in some jurisdictions may incur a higher rate of tax on distributed capital than on any capital gains which are realized on disposal of fund shares. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared to distributing (-dist) share classes. Investors should seek their own tax advice. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company.
