## Performance Review

UBS (Lux) Strategy Fund - Yield Sustainable (CHF) P-acc

**Global stocks and major fixed income markets delivered positive returns once again in September as the Fed embarked on its widely expected rate-cutting cycle, joining other central banks worldwide in improving the rates environment. Meanwhile, Chinese stocks held onto their momentum, aiming to maintain this into October.**

<sup>2</sup> YTD: year-to-date (since beginning of the year)

### Monthly performance

In September the fund performed positively with 0.4%. Major global equity markets performed positively, with China leading the rally, whereas Swiss and UK equities lost ground. Most fixed income markets closed the month in positive territory too, despite concerns regarding economic growth.

### YTD performance

YTD as of the end of September, the fund has delivered a positive performance of 4.5%. Both equities and fixed income have contributed positively in 2024 to date. This is mainly thanks to Swiss ESG leaders as well as ESG improvers and ESG engagement stocks. On the fixed income side, the largest contributors have been corporates, multilateral development bank (MDB) bonds and sustainable bonds.

### Performance contributors

Both equities and fixed income performed positively over the month, with the biggest contribution coming from fixed income, notably from corporate and sustainable bonds. In the equity space, the biggest contributors were EUR ESG leaders, ESG improvers and ESG thematic.

### Performance detractors

There were no significant detractors in September.

## Current investment strategy

We maintained our overweights in emerging market and Australian government bonds at the expense of MDB and Italian government bonds. In addition, we opened a long position in US 5-year Treasuries at the expense of 30-year Treasuries. On the equity side, we remained overweight in IT stocks versus global equities. We remain overweight in the EUR, CHF, GBP and AUD at the expense of the USD and CNY.

## Risks

The fund invests in bonds of varying credit quality, money market securities and equities on a global basis, and may therefore be subject to fluctuations in value. The fund may use derivatives which can reduce investment risk or give rise to additional risks (inter alia the counterparty risk). The value of a unit may fall below the purchase price. This requires an elevated risk tolerance and capacity. Every fund reveals specific risks, a description of these risks can be found in the prospectus. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.
