

UBS Dynamic Income Fund USD

Performance **Review**

UBS (Lux) Strategy SICAV - Dynamic Income (USD) Q-acc

Performance (basis USD, net of fees)¹

Past performance is not a reliable indicator of future results.

Performance in % (net of fees)¹

in %	2020	2021	2022	2023	2024 YTD ²	Oct. 2024	5 years Ø p.a. 5 years
Fund (USD)	6.91	7.21	-13.55	12.02	9.08	-1.06	23.76

The performance shown does not take account of any commissions, entry or exit charges.

¹ These figures refer to the past. **If the currency of a financial product, financial service or its costs is different from your reference currency, the return and/or costs can increase or decrease as a result of currency fluctuations.** Source for all data and chart (if not indicated otherwise): UBS Asset Management.

² YTD: year-to-date (since beginning of the year)

Macro data published in October was mixed but resilient. Global equity markets were generally down over the month, while fixed income sold off across the period.

Monthly performance

In October the fund performed negatively with 1.1%. Global equities produced a mixed performance in October as investor sentiment fluctuated amid economic uncertainty. Fixed income saw yields rise on solid economic data. Credit markets were solid across the period.

YTD performance

YTD as of the end of October, the fund has delivered a positive performance of 9.1%. The momentum surrounding AI continues to slow as sectoral leadership moves away from expensive tech stocks. Fixed income markets are pricing out recession risks, driven by stronger-than-expected US activity data.

Performance contributors

The fund's covered call strategy contributed positively across the month.

Performance detractors

Equities, fixed income and real estate investment trusts (REITS) all detracted from performance. Developed market equities were the largest detractor from performance, while global high dividend and emerging market equities also detracted. Meanwhile in fixed income, US investment grade and US government bonds were the largest detractors.

¹ All the figures in above table are target weights. The Portfolio Manager rebalances the portfolio back to the target weights each month end (leaving a flexibility of up to +/-1% deviation from target). The effective weights therefore are very close to the target weights.

Current investment strategy

With signs that inflationary pressures are abating and growth is weakening, major central banks have kicked off their easing cycles and seem ready to assess the full effects of policy tightening. Against this backdrop, we see the yields offered by high-grade bonds as an attractive source of income.

Risks

The fund invests in equities as well as bonds with lower credit ratings or longer duration and can undergo major value fluctuations. The fund may hold substantial assets in fixed income with higher issuer default or liquidity risk. Its value will also be impacted by interest rate and credit spread movements. Due to the sale of call options, the fund can lag behind general growth levels during bull market phases. Despite the dynamic asset allocation adapting to various market cycle stages, the fund may nevertheless fail to meet its target income range. The combination of a medium to high risk profile and regular income payments out of the fund (out of distributing classes), results in a heightened risk of experiencing a diminution in value over time. The fund may use derivatives which can reduce investment risk or give rise to additional risks (including the risk of counterparty bankruptcy). These factors presuppose an elevated risk tolerance and capacity. Every fund has specific risks which can significantly increase under unusual market conditions. A description of the fund specific risks can be found in the prospectus. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.
