

UBS Strategy Xtra Fund Balanced CHF

Performance **Review**

UBS (Lux) Strategy Xtra SICAV - Balanced (CHF) Q-dist

Global markets continued navigating through uncertainty on growth, potential political shifts emerging from elections and geopolitical tensions. This detracted from returns in the global equity and fixed income markets alike.

Performance (basis CHF, net of fees)¹

Past performance is not a reliable indicator of future results.

Performance in % (net of fees)¹

in %	2020	2021	2022	2023	2024	Oct. 2024	5 years Ø p.a. 5 years
Fund (CHF)	2.37	8.40	-12.99	3.13	4.75	-1.41	6.48

The performance shown does not take account of any commissions, entry or exit charges.

¹ These figures refer to the past. **If the currency of a financial product, financial service or its costs is different from your reference currency, the return and/or costs can increase or decrease as a result of currency fluctuations.** Source for all data and chart (if not indicated otherwise): UBS Asset Management.

² YTD: year-to-date (since beginning of the year)

Monthly performance

In October the fund performed negatively with 1.4%. Both global equities and fixed income detracted as the Fed's rate-cutting cycle was repriced. This led to higher yields amid ongoing US economic strength and uncertainty surrounding the US election, which also had a negative impact on equities. Earnings started strongly thanks to positive results from US financials, but the market displayed mixed reactions to reporting in the tech sector.

YTD performance

YTD as of the end of October, the fund has delivered a positive performance of 4.7%. Equities and fixed income have contributed positively. In equities, global opportunity and global high-dividend stocks have contributed the most. In fixed income, USD corporate and high-grade bonds are the main performance drivers. Hedge funds have also delivered a notably positive contribution.

Performance contributors

Fixed income made a positive contribution, while equities detracted. In fixed income, the main contributors were US high-yield bonds, as well as emerging market (EM) corporates and sovereign bonds. In equities, global high-dividend stocks and exposure to the US ESG market delivered notably positive contributions. Hedge funds and risk parity contributed positively.

Performance detractors

The main detractors were high-grade bonds in the fixed income space and Swiss stocks within equities.

Current investment strategy

We closed our overweight positions in Australian versus Italian government bonds and in EM versus high-grade bonds. In equities, we opened a long position in US equities versus cash. We remain overweight in IT stocks versus global equities. Currency-wise, we remain long in the EUR, CHF, GBP and AUD versus the USD and CNY.

Risks

The fund invests in equities, bonds of varying credit quality, money market securities on a global basis, as well as in alternative forms of investment such as hedge funds. It may therefore be subject to fluctuations in value. The fund may use derivatives which can reduce investment risk or give rise to additional risks (inter alia the counterparty risk). The fund can invest in less liquid assets that may be difficult to sell in the case of distressed markets. It therefore cannot be ruled out that the daily issue and redemption of fund units may be suspended temporarily. The value of a unit may fall below the purchase price. This requires an elevated risk tolerance and capacity. Every fund reveals specific risks, a description of these risks can be found in the prospectus. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.
